Custom Iron Doors &
Architectural Metalwork

CUSTOM IRON WORK

Since 2008, G & G Designer Doors has been a trusted Metro Atlanta resource for custom iron work in the luxury market. We work directly with distributors, builders, architects, homeowners and designers from initial concept through final installation.

We specialize in the bridge between complex architectural vision and flawless physical execution.

Specialized Support: We operate as a dedicated consultancy, with owner-led project management to ensure every piece meets our "White Glove" standard.

Proven Excellence: With hundreds of successful installations in Georgia's most prestigious zip codes, our portfolio spans custom entry doors, wine enclosures, and intricate hand-forged railings, interior and exterior staircases and more.

COMPLETE PROJECT MANAGEMENT

Technical Precision / Architectural Integration: We work with your architect, designer and other team members on every project, ensuring our ironwork respects your exact dimensions and structural framing.

Owner – Led Coordination
We work directly with the project team, participating in team meetings, coordinating complex field dimensions, fabrication and scheduling.

One Point of Accountability
Unlike imported product models where manufacture and customer service access may be limited, G & G remains actively involved throughout the project – from design coordination and field dimensions to installation and finish out.

ONE HOME. ONE RESOURCE

Our work often extends across multiple areas of a residence- from entry and interior doors to wine enclosures, rails and staircases, providing continuity in design, fabrication and installation.
