TRUSTILE WOOD ENTRY SYSTEMS

DESIGN THAT MOVES YOU

See page 30 for product details.

THE TRUSTILE STORY

Since 1995, TruStile has put design at the center of our products and processes. From the materials we select to our exacting craft and design, we engineer for quality that sets the tone for the whole home. In collaboration with our parent company, Marvin®, we have created a family of premium entry systems that don't just transform a space, but how you feel inside it. Make the entry to your new home a most welcoming invitation with an exceptional entrance by TruStile.

TRUSTILE ENTRY SYSTEMS MATERIAL CONSTRUCTION

Resilient Wood Entry Systems™

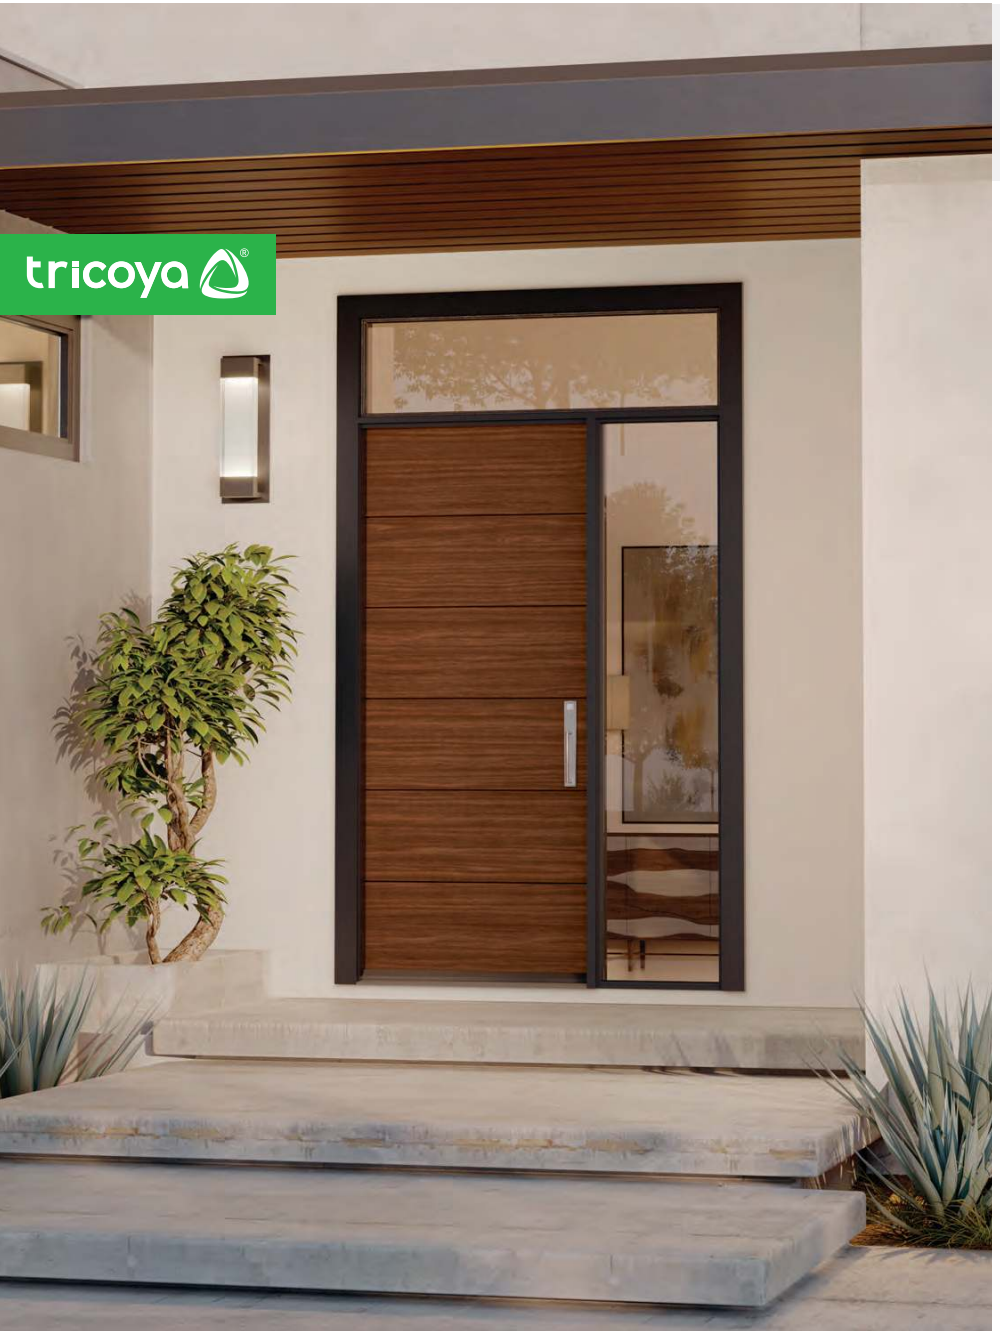

The Resilient Wood Entry System sets the tone of quality for the whole home using the most durable painted construction without sacrificing any design options.

- Engineered with resilient Accoya®, an acetylated wood product, which brings unprecedented reliability and durability to wood.
- Tricoya® top layers provide exceptional stability, durability and paintability, for outdoor applications.
- Most configurations delivered pre-hung with an Accoya built jamb and a premium prime finish, ready to paint to match your design.
- 10-year warranty with limited and no-overhang applications, depending on system design specifications, for both inswing and outswing units.

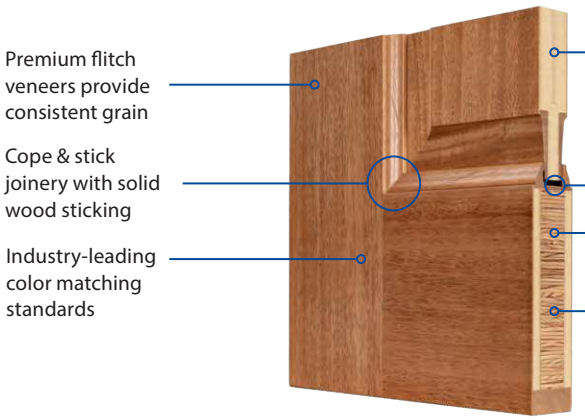

Choose the Material Best Suited for Your Project

Both material construction options have been extensively tested and proven in partnership with the Marvin® Research and Development team.

Reserve Wood Entry Systems™

The Reserve Wood Entry System elevates the refined elegance of your home with the beauty of stained natural wood.

- Engineered with a laminated veneer lumber (LVL) core and Tricoya® layers to provide exceptional stability and durability.
- 10 natural wood species available with an extensive collection of premium factory stain options.
- Premium appearance standards ensure industry-leading grain and color matching.
- 5-year limited warranty with industry standard overhang requirements for both inswing and outswing units.

TRUSTILE ENTRY SYSTEMS

TWO WAYS TO CREATE YOUR ENTRY SYSTEM

Start designing at
www. trustile.com/configurator
Details on page 96.

Select From Our Featured Entry Systems

We've created over 80 featured entry systems that capture the current trends of popular architectural styles. Start with the style most closely matching your vision for your home and tailor it to match your tastes and requirements.

Or Build Your Own Entry System

Design your custom entry system in a few simple steps. Choose the right material for your project. Select from over 500 door styles and endless design options. Then finalize the details to your exact specifications.

Select From Over 80 Featured Entry Systems

Resilient TS4200-101 outswing entry system with One Step (OS) sticking and Raised (A) panel.

Outswing Doors for Residential Applications

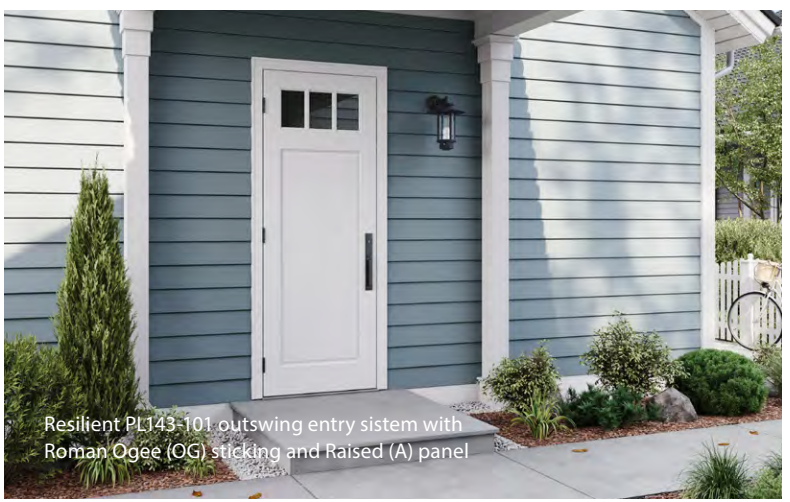

The Resilient and Reserve Wood Entry System is available for residential outswing applications including porch, side of house, and garage entrances.

TruStile Resilient Entry Systems™

- Engineered with resilient Accoya® and Tricoya® — acetylated wood solutions that bring unprecedented reliability and durability to wood for painted outdoor applications.
- Available in single and double door configurations, featuring an aluminum outswing sill with an oak threshold. Transoms and sidelites are not yet available.
- Features Emtek® solid brass non-removable pin hinges paired with a solid Accoya® frame for maximum performance.
- GU-Secury Automatic multipoint lock required for applications without an overhang and dark painted colors.
- Most configurations are delivered pre-hung with a premium prime finish, ready to paint to match your design.
- 10-year warranty available on residential projects with reduced and no overhang openings, depending on system design specifications.

TruStile Reserve Entry Systems™

- Elevates the refined elegance of your home with the beauty of stained natural wood.
- Engineered with a laminated veneer lumber (LVL) core and Tricoya® layers to provide exceptional stability and durability.
- Single doors and double doors (per leaf) available up to 48" wide and 120" tall.
- 10 natural wood species available with an extensive collection of premium factory stain options.
- Premium appearance standards ensure industry-leading grain and color matching.
- 5-year limited warranty on residential projects, with industry standard overhang requirements.
- Features Emtek® solid brass non-removable pin hinges.

Resilient PL143-101 outswing entry sistem with Roman Ogee (OG) sticking and Raised (A) panel

Reserve FL451-101 outswing entry system in select alder with White Haze finish, Bevel (BV) sticking, Raised (F) panel and clear glass.

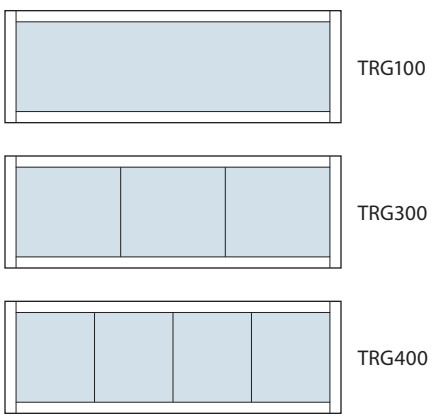

Transoms

Select from this extensive collection of transoms to complement your entry door.

IN-SASH SQUARE TRANSOMS

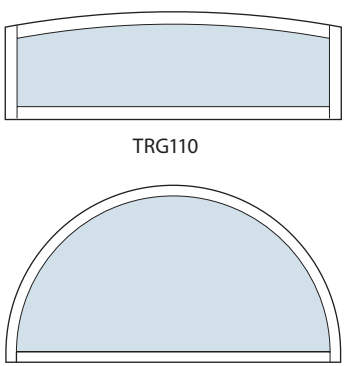

Available in 1- to 18-lites.

ARCH- AND RADIUS-TOP TRANSOMS

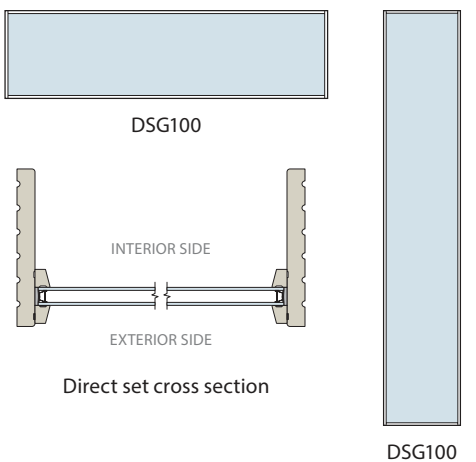

Available only for TruStile Reserve

DIRECT SET SIDELITES AND TRANSOMS

Maximize the amount of natural light available.

Sidelites

Select from this extensive collection of sidelites to complement your entry door. Many panel doors available with glass options.

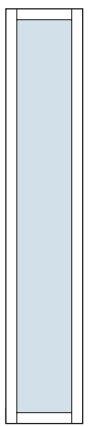

ONE-LITE IN-SASH SIDELITES

COMPLEMENTARY SIDELITES

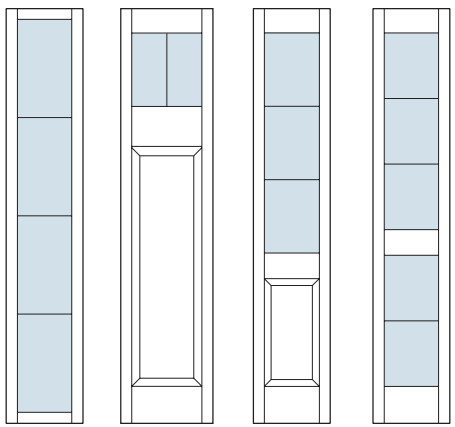

MATCHING DOOR SIDELITES

A one-lite in-sash sidelite is a classic look that brings natural light into your entrance.

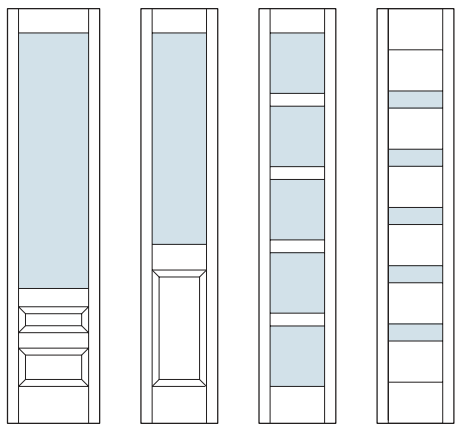

Order sidelites with stiles and rails as narrow as 1-⅞".

We offer a wide selection of sidelites to complement your door style.

FL400 PL142 pl103 FL362

Many door styles are available as a matching sidelite.

TS3130 pl100 TS5000 TM9340

Note: Most door styles on pages 68-78 can be selected as a sidelite.

Resilient and Reserve Wood Entry Systems Construction

In collaboration with our parent company, Marvin®, we have engineered a family of premium entry systems that don't just transform a space, but how you feel inside it.

TruStile Entry Systems have been extensively tested and proven in partnership with the Marvin Research and Development team.

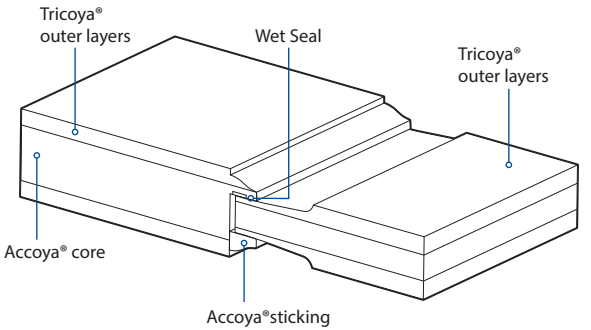

So, What is Acetylation?

Acetylation is a process used to enhance the naturally-occuring properties of wood. In simple terms, it 'pickles' the wood, reducing how much water the cells in the wood can absorb.

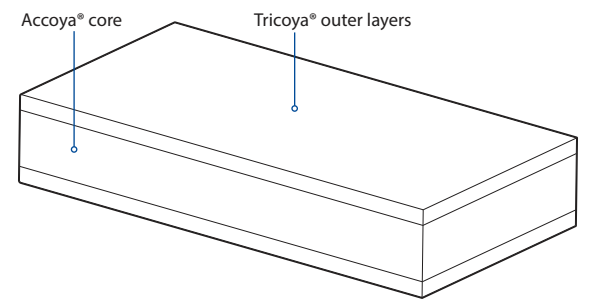

The process uses acetic anhydride, a derivative of vinegar, to change hydroxyl groups in the wood (which like water) into acetyl groups (which don't like water), resulting in improved performance characteristics without harmful or environmentally unfriendly additives.

Altogether, this means the wood shrinks and swells much less when wet, and is much less susceptible to decay or insect attack. The finished product is highly durable and dimensionally stable, outperforming all known species of wood.

Wood Performance Every Home Can Rely On

Learn more about the innovative, durable materials used in making our entry systems.

tricoya®

As the sister brand to Accoya®, Tricoya® is an acetylated wood panel product that achieves the same ultra-high levels of durability and stability in the most extreme and challenging climates and outdoor applications. Tricoya is used as a stable core material within the Reserve™ Wood Entry system and a durable, paintable surface layer of our Resilient™ Entry system.

- Doesn't shrink or swell like other wood products
- Superior paintability and consistent surface across the entire door
- Complies with CARB 93120 for No Added Formaldehyde

accoya®

Accoya® is an acetylated, modified wood product that is unsurpassed when it comes to durability, stability and withstanding the test of any climate.

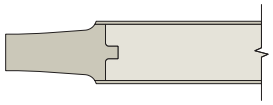

As part of the TruStile Resilient™ Entry System, Accoya® is used for the core and frame components for durability, stability, and superior rot resistance.

- Doesn't shrink or swell like other wood species
- 100% real wood. A sustainable and durable material
- Solid wood core provides superior screw holding on door edge

Stain Options

TruStile uses stains from ICA, a leading European finish manufacturer, for factory-finished entry systems. We begin by applying either a clear or tinted base stain with UV inhibitors (unfinished doors also get this base coat). Then a total of five coats of finish are applied. This includes two seal coats and three topcoat layers of finish giving a robust dry film finish thickness. Slight color and sheen differences might occur between interior and exterior finishes.

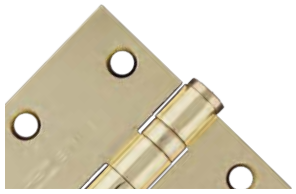

White oak is available as rift sawn, plain sawn or quarter sawn. Plain sawn white oak shown above.

The color of the finish can vary depending on the color of the wood, lighting on the job site, and natural exposure to oxidation and sunlight. To get the best example of the stain color on a specific species, please visit your TruStile dealer.

Hinge Options

Entry systems include 4-1/2" × 4-1/2" TruStile ball-bearing hinges; available in 11 finish options.
Emtek® and Baldwin® hinges can be specified and are available in 5" × 5" size and solid brass.

Industry-Leading Warranty Coverage

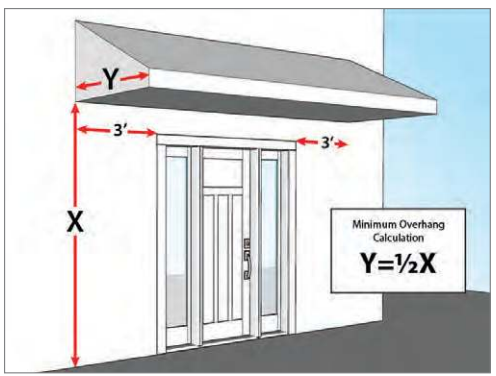

TruStile Wood Entry Systems come backed with industry-leading warranty coverage. Door systems that are factory finished by TruStile are warrantied to be free from manufacturing defects for 5 years from date of purchase for the Reserve Wood Entry System™ and 10 years from date of purchase for the Resilient Wood Entry System™ depending on application and specifications. Door systems purchased raw and unfinished are warrantied to be free from manufacturing defects for 3 years from date of purchase. Due to its aging characteristics, Alder door systems are warrantied for 1 year from date of purchase.

Please see **www.trustile.com/warranties** for specific detail warranty information for each product.

Requirements for Warranty Coverage

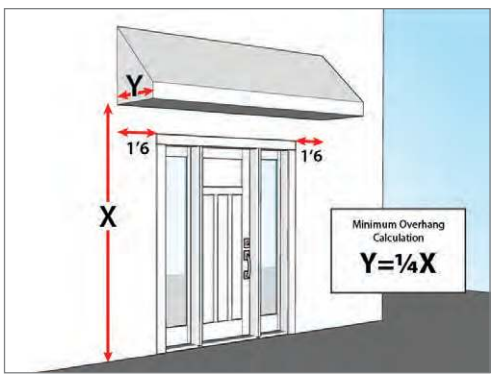

Your TruStile Entry Door should be viewed as a piece of well-engineered fine furniture. Careful steps have been taken to design the product to perform in proper exterior openings. However, finishes and natural wood both weather and break down over time. This weathering process increases with greater exposure to the elements. TruStile Wood Entry systems, like those sold by other manufacturers, require proper overhang protection to meet warranty requirements (see diagram below for details). Proper overhang helps to protect both the finish and the natural wood from moisture and UV damage. Even with proper overhang, the topcoat of any stained natural wood door must be inspected annually and reapplied during early signs of fading. Maintaining the topcoat will maximize the life of your natural wood door and is also required to maintain TruStile warranty coverage.

Overhang Requirements

Standard Overhang

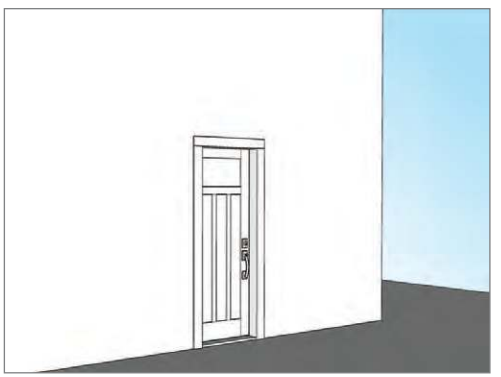

Required for Reserve Wood Entry System™ warranty coverage

Reduced Overhang

Required for warranty coverage on:

- Resilient Wood Entry Systems with sidelites and/or transoms
- Resilient single and pair units with oak adjustable sill
- Resilient pair units without multi-point locks

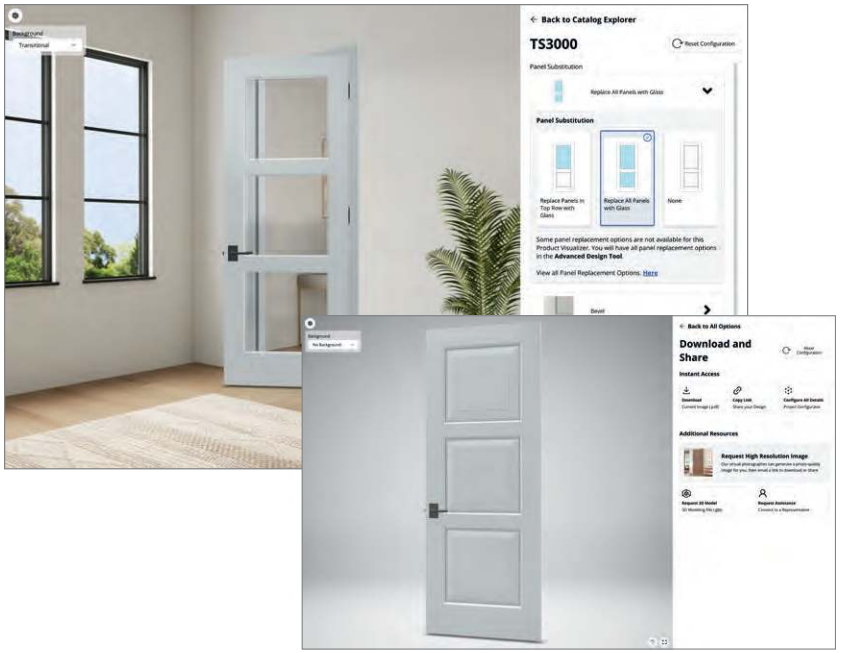

No Overhang Required

Warranty coverage available for Resilient single and pair units meeting the following:

- Hydrosill™ required
- 3'6 × 8'0 maximum single door width
- 6'0 × 8'0 maximum pair width
- Multi-point lock required for no overhang coverage on pairs

Design Tools

Design, Configure and Visualize Your Projects

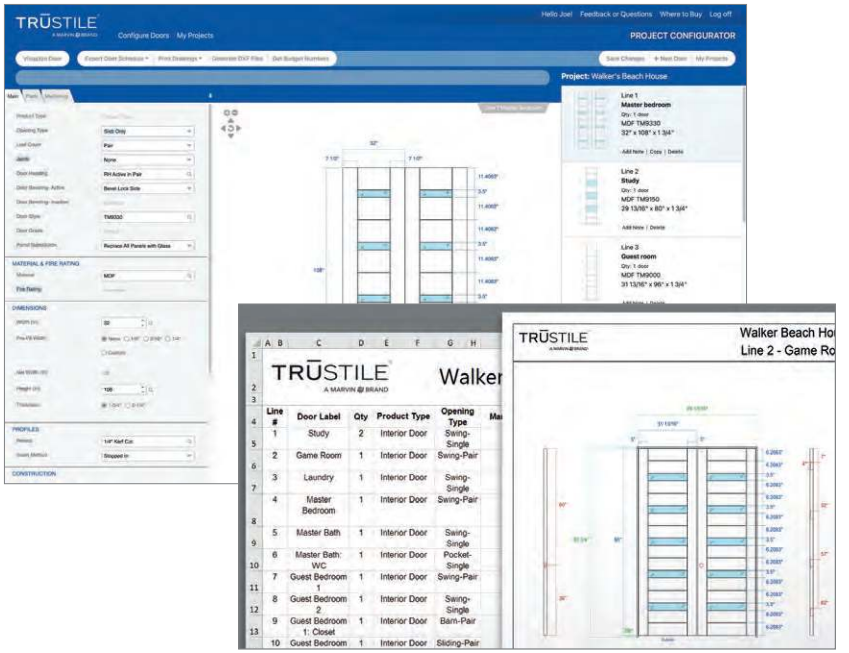

Door Visualizer

Imagine the possibilities for your home with the TruStile Door Visualizer. Customize your door's style and materials and see changes in real-time.

Share a link to your configured door with others or download a PDF tear sheet, high resolution image or 3D model for use in modeling programs.

www.trustile.com/visualizer

Project Configurator

Design your own door package. Specify the height, width and location of all components within a door and save to a project.

Project Configurator projects can be exported as a door schedule that opens directly in Microsoft® Excel, as a PDF of drawings or CAD models to import directly into your plans.

www.trustile.com/configurator

See page 45 for product specs.
