FL400 in rift sawn white oak with bevel (BV) sticking; customer-suppied finish and glass

PREMIUM ARCHITECTURAL DOORS

There was a time when doors were appreciated for their architectural value, gracing the openings of homes and embodying the principles of their design periods.

At TruStile, we miss those days. We are committed to partnering with architects, designers, home builders and homeowners to revive the rich tradition of building high-quality, architecturally-correct doors with a range of customization options to fit your preferences and your home's unique character.

TruStile Selection Guide

All Doors are Not Created Equal

TS3160 common arch pair in MDF with bolection (BM) moulding and raised (A) panel.

5 Steps to Designing Your Perfect Door

1

Door Style

From modern flush doors to traditional panel doors, choose from over 400 door styles to match your home's architecture.

2

Material

Select MDF for painted applications or choose from 20 wood species.

MDF

Mahogany

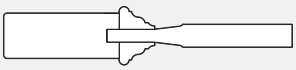

Walnut

White Oak

3

Profile Options

Refine your design with the widest selection of profile options to match your desired style.

Bolection (BM) moulding with raised (A) panel

Flush construction with 1/4" kerf cut reveal

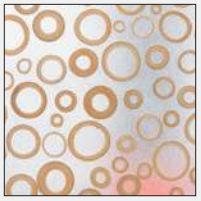

Square stick (SS) sash

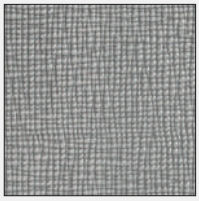

4

Decorative Inserts

Consider exchanging a panel for a unique material insert — glass, resin, leather or metal.

Glass

Resin

Leather

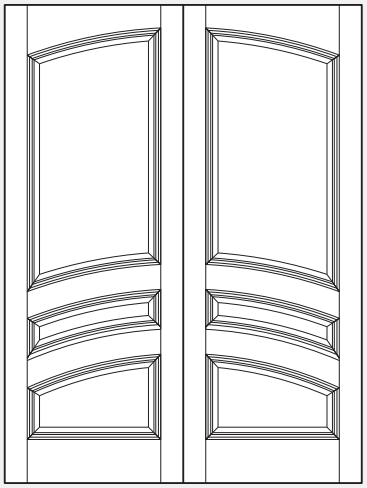

Metal

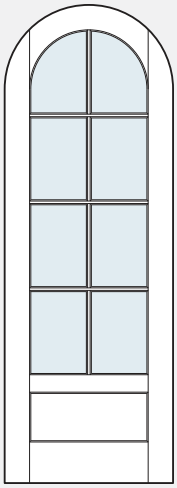

5

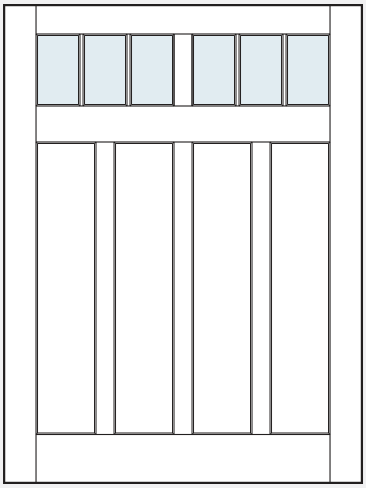

Design Options

Further customize your doors with unique options such as a barn door or common arch pair.

See page 98 for more ideas.

TS3160 Common Arch Pair

PL243 Barn Door

Go Beyond the Ordinary

All too often, doors are an overlooked design element — even in high-end custom homes that include an otherwise impressive selection of amenities and upgrades.

Other manufacturers have focused on value-engineering doors, thus diminishing their structural and design integrity. However, the visual impact of high-quality architectural doors is dramatic.

Before: (Above) Bath remodel features builder-grade Shaker style doors

After: (Right) TM9000 in MDF with inset mirror (left) and TS5000 in MDF with one step (OS) sash and white lami glass.

Vary Door Size to Create Focal Points

Upon entering this home, visitors are greeted by massive 10-foot-tall doors in luxurious dark walnut. The sheer scale and high-end materials emphasize the importance of the space and create a separation between entertainment spaces and the family's private spaces.

Left: TM13340 doors in walnut with Cappuccino finish and frosted glass

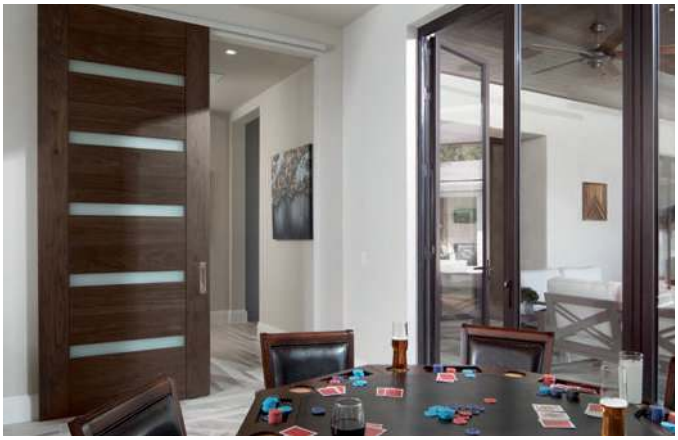

Define Spaces with Materials

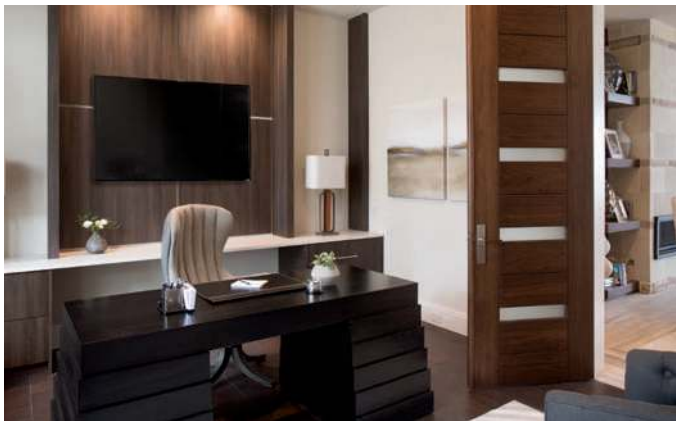

Varying materials creates interest while transitioning between spaces.

Right: A TM13340 barn door in walnut opens to the family game room

Below Left: TM13340 office door in walnut

Below Right: TM13340 in painted MDF used in the master bedroom.

Variations On a Theme

Select a group of door styles that share similar styles, finishes and materials. Here, a new door style is used for guest and children's rooms. The door style relates visually to other doors in the home, but introduces a more casual feel.

Left: TM9420 pocket door in MDF with Tuxedo glass

Below: TM13340 in painted MDF with frosted glass

TS2020 in walnut and white lami glass.

FIND YOUR ARCHITECTURAL STYLE

Where do you begin to choose the right door design for your home? TruStile makes the selection process fun and easy. With a range of materials and options for 12 popular architectural styles, TruStile provides the widest range of doors on the market today.

Read on and be inspired with just a few of our tantalizing options for distinctive, remarkable doors.

ART DECO

Art Deco is a design style that emerged in the 1920s and flourished in the 1930s and 1940s. It was a celebration of the machine age and a departure from traditional styles, emphasizing elegance and opulence. Characterized by its bold geometric shapes, rich colors, and luxurious materials, Art Deco reflects a sense of modernity and glamour.

COASTAL

Characterized by a light, airy aesthetic that reflects the natural beauty of coastal environments, this style incorporates elements inspired by the sea. Soft blues, whites, and sandy neutrals mix with natural materials like wood, rattan, and linen to create a serene atmosphere reminiscent of beachside living.

CRAFTSMAN

The American Craftsman style emerged from the English Arts & Crafts movement of the late 1800s and was a reaction to the overly decorative Victorian era. The style emphasizes simplicity of form, originality and local natural materials. Simplicity and quality workmanship define our Craftsman door collection.

INDUSTRIAL

The Industrial style draws inspiration from warehouses, factories, and other industrial spaces, showcasing raw and utilitarian elements like exposed brick, concrete, and metal — often paired with vintage or repurposed items to create a unique aesthetic. The style emphasizes open layouts, high ceilings, and a neutral color palette, resulting in spaces that feel both functional and stylish.

JAPANDI

Japanese minimalism and Scandinavian functionality mix to create an aesthetic emphasizing simplicity, natural materials, and a serene and harmonious environment. Key features include clean lines, handcrafted elements, and a focus on craftsmanship. Japandi interiors often incorporate plants and natural light to foster a connection with nature while maintaining an inviting atmosphere.

MAXIMALIST

Maximalist design is characterized by an abundance of colors, patterns, textures, and decorative elements. It embraces a “more is more” philosophy, encouraging the use of bold and eclectic combinations. This style often features layered furnishings, vibrant artwork, and collections of vintage and contemporary pieces, creating a visually stimulating environment.

MODERN FARMHOUSE

Traditional charm mixed with a contemporary aesthetic, create a harmonious blend of comfort and sophistication that feels both stylish and lived-in. There is a focus on simplicity and functionality, demonstrated in open floor plans, natural materials and a pale color palette. Key elements include exposed wooden beams, shiplap walls, and vintage-inspired furnishings that evoke a sense of nostalgia.

MDF Door Construction

TruStile pioneered the use of medium density fiberboard (MDF) as a preferred material for painted door applications, realizing its many advantages over alternative materials like natural wood. Since we introduced our MDF doors to the market, we've seen many impersonators.

Stile & Rail Construction

- Made to order and built to any size and style.
- Built with genuine stile and rail construction — never routed or stamped with poplar Wedge Edge® provides a secure mount for hardware.
- Made with solid, super-refined MDF that provides a smoother painting surface than pine, poplar or lower-grade MDF alternatives.
- Engineered for maximum stability and durability — won't shrink, expand or warp when exposed to environment.
- More affordable than wood doors.

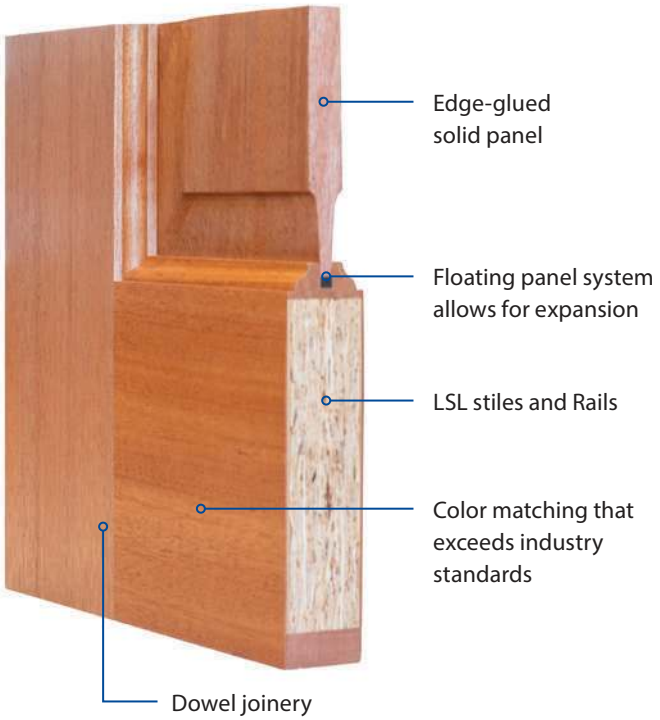

Flush Door Construction

- Made to order and built to any size and style.
- Laminated Strand Lumber (LSL) core with poplar Wedge Edge® provides a secure mount for hardware.
- Made with solid, super-refined MDF that provides a smoother painting surface than pine, poplar or lower-grade MDF alternatives.
- Engineered for maximum stability and durability — won't shrink, expand or warp when exposed to environment.
- More affordable than wood doors.

Pair of TS6110 doors in MDF with Roman Ogee (OG) sticking and Flat (C) panel

Natural Wood Door Construction

TruStile Wood Doors

STILE & RAIL CONSTRUCTION

TruStile natural wood doors are the ultimate expression of luxury for today's interiors. Each door is made to order and meticulously constructed with a blend of traditional and state-of-the-art materials and methods.

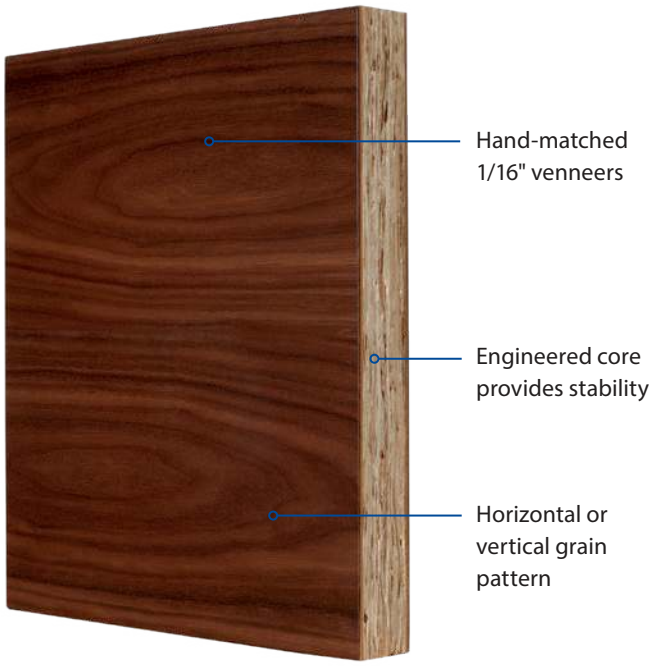

- Stiles and rails are faced with 1/16" flitch veneers, hand-selected for a consistent appearance that enhances the natural beauty of wood.
- Raised panels are built of solid lumber staves, hand-sorted for a well matched, premium appearance.
- Stile and rail construction, combined with cope and stick joinery, allows for design flexibility and provides precise, architecturally correct details.
- Solid lumber edges, laminated strand lumber (LSL) core and dowel joints provide exceptional strength, durability and stability.
- Our floating panel system utilizes flexible cushions to secure all panel edges, accommodating the natural expansion and contraction of wood while preventing shifting and rattles.

TruStile Reserve® Wood Doors

STILE & RAIL CONSTRUCTION

Designed to the highest level of quality, TruStile Reserve Wood Doors are the ultimate expression of luxury for today's interiors and made to order using the latest technological advances combined with meticulous handcrafted detail.

- All door styles, panel options, and sticking profiles, and are customizable to meet specific project applications.
- Stiles and rails are faced with 1/16" flitch veneers, hand-selected for a consistent appearance that enhances the natural beauty of wood.
- Upgraded raised panels are built with hand-sorted lumber staves and a composite lumber core, providing a stable panel that doesn't expand or contract like solid wood panels.
- Stile and rail construction, combined with cope and stick joinery, allows for design flexibility and provides precise, architecturally accurate details.
- Solid lumber edges, laminated strand lumber (LSL) core and dowel joints provide exceptional strength, durability and stability.

TruStile Reserve® Wood Doors

FLUSH CONSTRUCTION

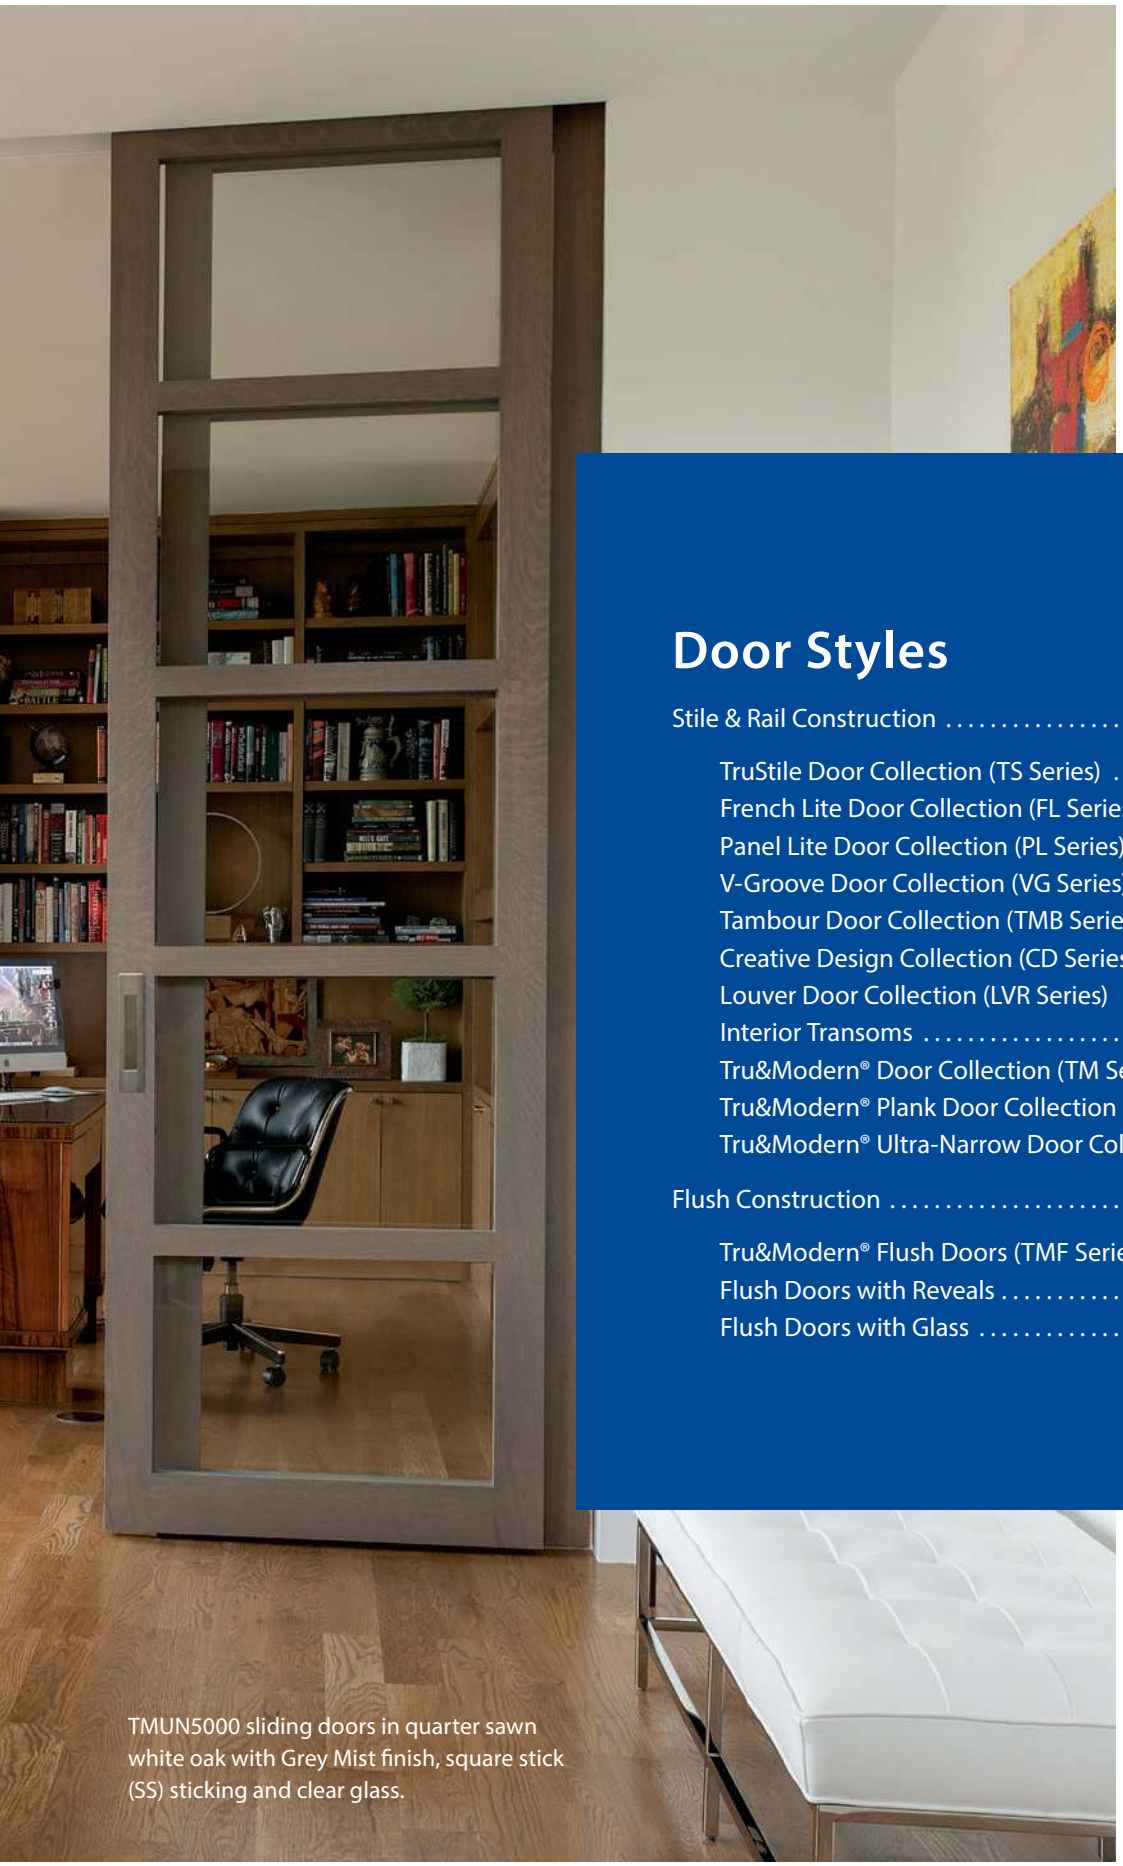

TruStile has developed the first high-end flush doors designed specifically for the residential market. Our highly engineered core provides stability for the door while a continuous, matching hardwood edge on all four sides provides a seamless and beautiful appearance.

- Hand selected 1⁄16" flitch veneers are precision matched by wood species to optimize the beautiful natural wood aesthetics across every door.
- On door pairs, veneers are matched across the faces of both doors to ensure a consistent look across the opening.
- Available in both horizontal and vertical grain orientations, or a combination of both with our sketch face designs.
- TruStile Reserve flush doors are engineered with a laminated strand lumber (LSL) core, HDF cross bands and solid lumber edges to provide exceptional strength, durability and maximum stability.

Louver Door Collection (LVR Series)

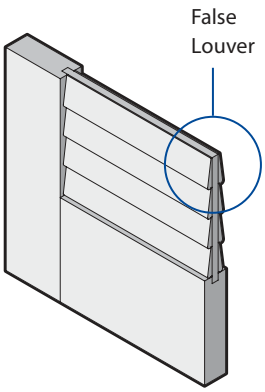

Our Louver door collection creates architectural interest and enhances a variety of styles. These plantation-style louver doors feature fixed, over-sized louvers in vented and false configurations.

LVR1000 barn doors in Walnut with false louver panels

Louver Door Profile Options

Vented Louver Doors

Vented louver doors permit air flow making them ideal for closets and laundry rooms where ventilation is preferred.

False Louver Doors

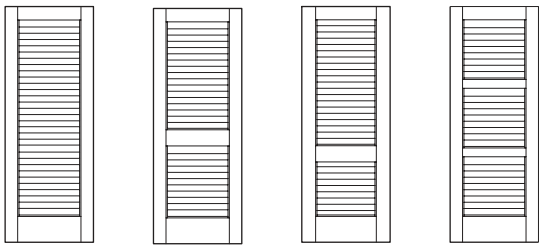

False louver doors are ideal for applications where the appearance of a louver panel is desired, but total privacy is needed.

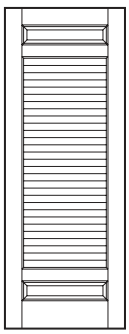

Both vented and false louver slats are 2"

LVR2020 in MDF

TS3080 in mahogany with Roman ogee (OG) sticking, raised (A) panel and louver panel added to center.

Louver Door Styles

CREATE YOUR OWN LOUVER DOOR

Louver panels can be added to most door styles with a rectangular panel (minimum size requirements apply). The example on the left features a TS3080 with a middle false louver panel.

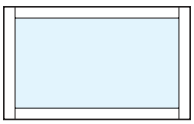

Interior Transoms

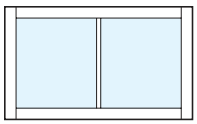

Open up interior spaces by allowing in more natural light. Interior glass and panel transoms provide more options for beautiful, dramatic openings.

TMF1000 flush doors in rift sawn white oak with Hazelnut stain.

FLUSH DOOR CONSTRUCTION

In 2018, TruStile introduced the first flush door designed for the high-end residential market. Previously, value-engineered, builder-grade doors and commercial office doors were the only flush door options available. TruStile saw a need for flush doors with the refinement required for today's modern interiors.

TruStile flush wood doors feature 1/16" thick hand-selected veneers, precision-matched to optimize the beautiful character found across each species of natural wood. TruStile flush MDF doors feature ultra-refined MDF, the smoothest surface for painted applications, paired with an engineered core for unparalleled stability.

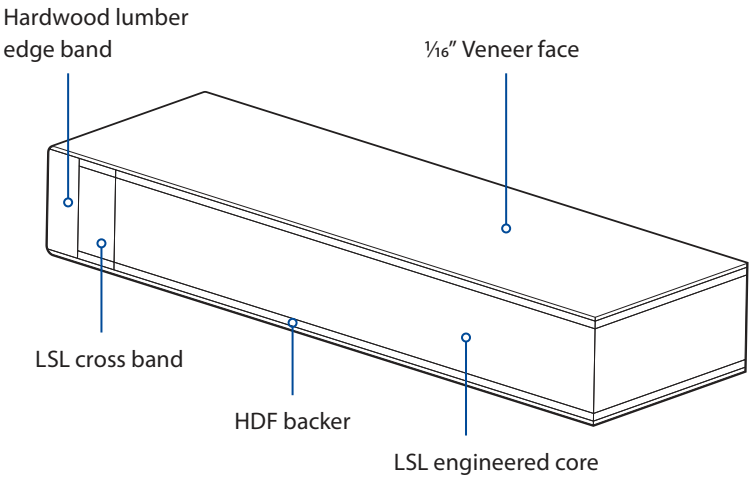

Detailed information on TruStile flush doors is available in our *Flush Door Specification Guide*. Download for free:

www.trustile.com/flush-guide

Tru&Modern® Flush Doors (TMF Series)

TruStile Reserve® Flush Wood Doors

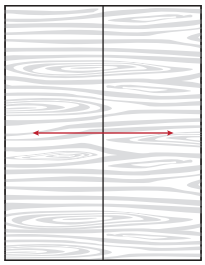

- Hand-matched 1/16" veneers are available in both horizontal- and vertical- grain.
- A highly engineered core provides stability for the door while the matching hardwood edge provides a beautiful finish.
- Made to order in sizes up to 4′ × 10′.
- Available in most standard wood species.

TMF1000 flush door in plain sawn white oak with Grey Mist finish.

Hand-Matched Pairs

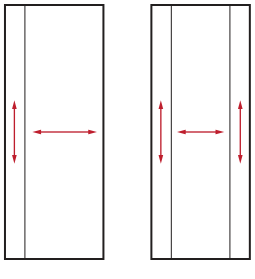

When hand-matching veneers for a pair of doors, TruStile treats the pattern as though it was covering one extra-wide door. This creates a continuous grain pattern across the width of both doors.

On horizontal pairs, wood grain is continuous across the face of both doors.

Sketch Face Flush Doors

TruStile offers two sketch face door styles. These create a pattern by combining vertical and horizontal hand-matched veneers on the same door face.

TMF1002 sketchface flush door in walnut with clear coat finish.

TMF1000 flush door in
mahogany with Ebony finish.

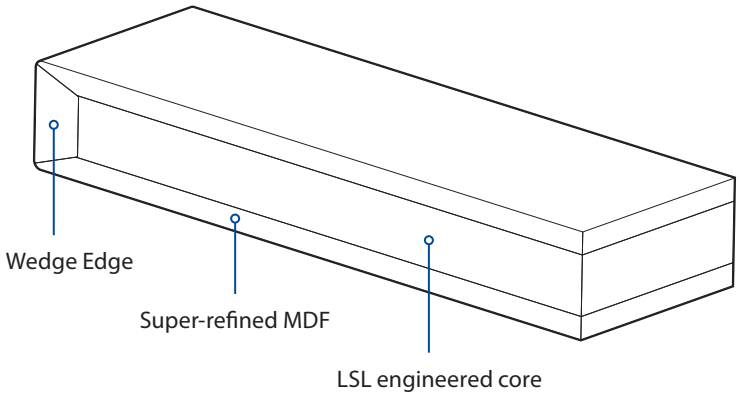

TMF1000 barn door in MDF.

Flush MDF Doors

- Highest quality, super-refined MDF creates a smooth paintable surface.
- A highly engineered core provides stability for the door while the Wedge Edge®, our patented hardwood edge system, provides a secure mount for hardware.
- Made to order in sizes up to 4′ × 10′.

Simonswerk®

Tectus Concealed Hinges

Simonswerk Tectus concealed hinges offer a sleek, clean look perfect for today's modern interiors. These precision hinges are fully adjustable in three dimensions, making it simple to create a perfect margin between the door and frame.

Our concealed hinge offering is available on any of our 1-¾" or 2-¼" thick doors and provides a complete solution: precision-machined door, fully prepped ready-to-assemble jamb and choice of Tectus hinges. Not available on pre-hung units.

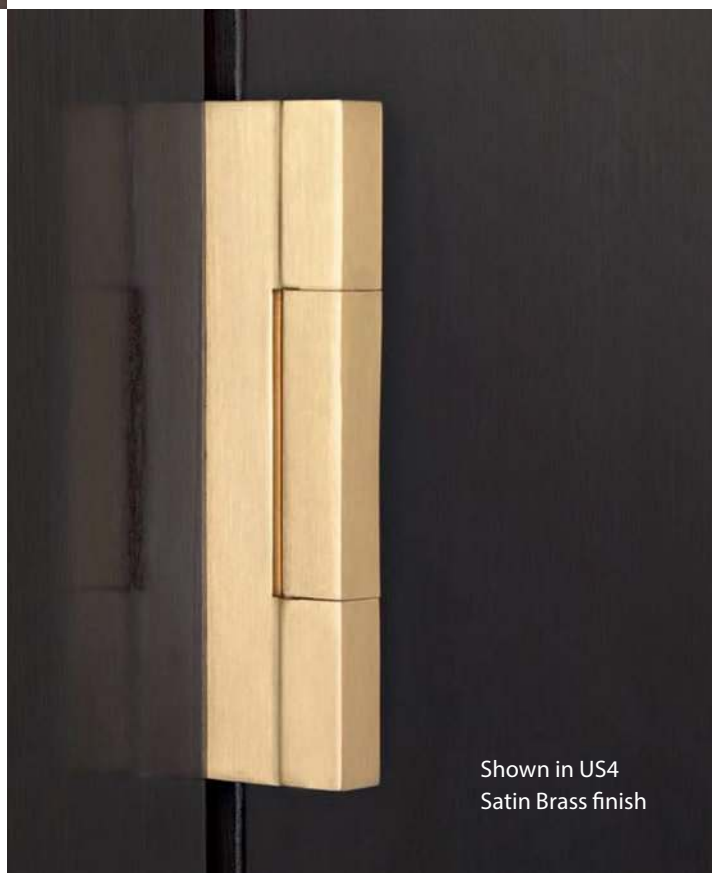

Emtek®

Square Barrel Hinges

Emtek square barrel hinges offer a unique, modern rectangular spine profile when the door is closed. With smooth action, a solid brass construction and loads of style, these hinges offer a sophisticated look and feel.

The hinge barrel also features no exposed screws for an aesthetically clean look, unlike some other options on the market.

Emtek square barrel hinges are available in 3-½" × 3-½", 4" × 4" and 4-½" × 4-½" sizes and are available in a wide variety of finishes.

Jambs

Traditional Jambs

TruStile has streamlined the ordering process and made it easy to design jamb solutions for every opening. Choose from stain-grade and paint-grade materials to match the doors and trim of your space.

Our traditional jambs are available pre-hung, or as a knockdown assembly, and are available with fire ratings. Choose from a variety of configurations including single or double rabbet jambs or flat jambs with applied stop.

Modern Architectural Door Jambs

In addition to our traditional jamb offering, TruStile has introduced a new line of modern casing-less door jambs. These jamb configurations bring high-end, configurable designs that complete the look of modern openings in your projects.

Discerning building professionals and their clients will appreciate the innovative options that create seamless lines and eliminate the need for casing around each door throughout the home.

TruStile entry systems are available solely for residential applications.

Wood Entry Systems

Make the entry to your home a most welcoming invitation with an exceptional entrance by TruStile. In collaboration with our parent company, Marvin®, we have engineered a family of premium entry systems that don't just transform a space, but how you feel inside it.

With the Reserve Wood Entry Systems™ and Resilient Wood Entry Systems™ you have two options that take exterior doors to the next level. The Resilient Wood Entry System sets the tone of quality for the whole home using the most durable paint-grade construction without sacrificing any design options. The Reserve Wood Entry System elevates the refined elegance of your home with the beauty of stained natural wood.

Both entry system solutions have been extensively tested and proven in partnership with the Marvin® Research and Development team.

MARVIN®

For more information about our wood entry systems, download a copy of our Entry Systems Catalog.

www.trustile.com/entry

TMIR1002-102B in walnut with Ebony finish and ¼" kerf cut reveals.

Reserve Wood Entry System™

The Reserve Wood Entry System elevates the refined elegance of your home with the beauty of stained natural wood.

- Engineered with a laminated veneer lumber (LVL) core and Tricoya® layers to provide exceptional stability and durability.
- 10 natural wood species available with an extensive collection of premium factory stain options.
- Premium appearance standards ensure industry-leading grain and color matching.
- 5-year limited warranty with industry standard overhang requirements for both in-swing and out-swing units.

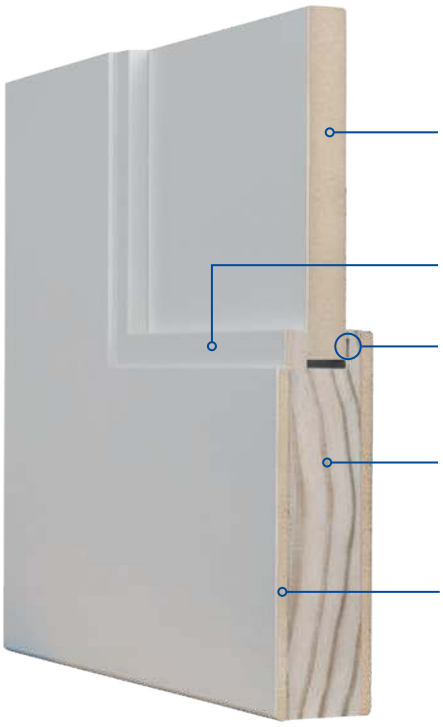

tricoya®

PL224-101 in Resilient engineered wood with cove & bead (CB) sticking, raised (A) panel and clear glass.

Resilient Wood Entry System™

The Resilient Wood Entry System sets the tone of quality for the whole home using the most durable painted construction without sacrificing any design options.

- Engineered with resilient Accoya®, an acetylated wood product, which brings unprecedented reliability and durability to wood.
- Tricoya® top layers provide exceptional stability, durability and paintability, for outdoor applications.
- Most configurations delivered pre-hung with an Accoya built jamb and a premium prime finish, ready to paint to match your design.
- 10-year warranty with limited and no-overhang applications, depending on system design specifications, for both in-swing and out-swing units.

accoya® tricoya®

TS6050 in maple with Roman ogee (OG) sticking and scoop (B) bladder-pressed panel.

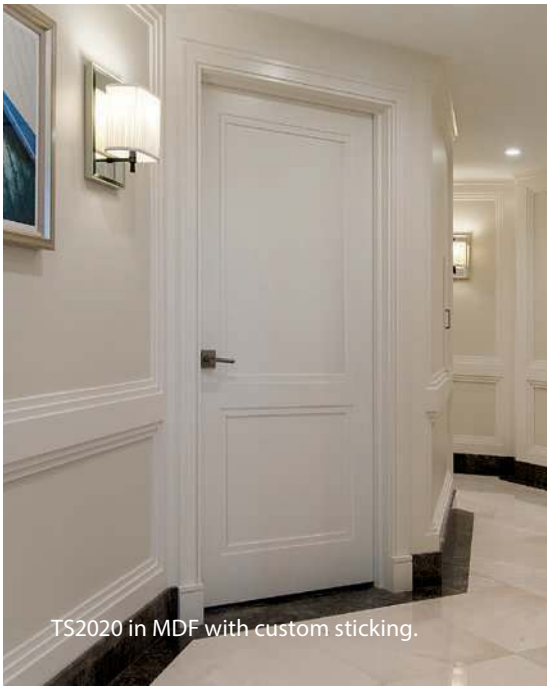

Commercial Specifications

From hospitality and high-end multifamily projects to health care and educational institutions, TruStile provides the right finishing touches for distinctive projects across the United States.

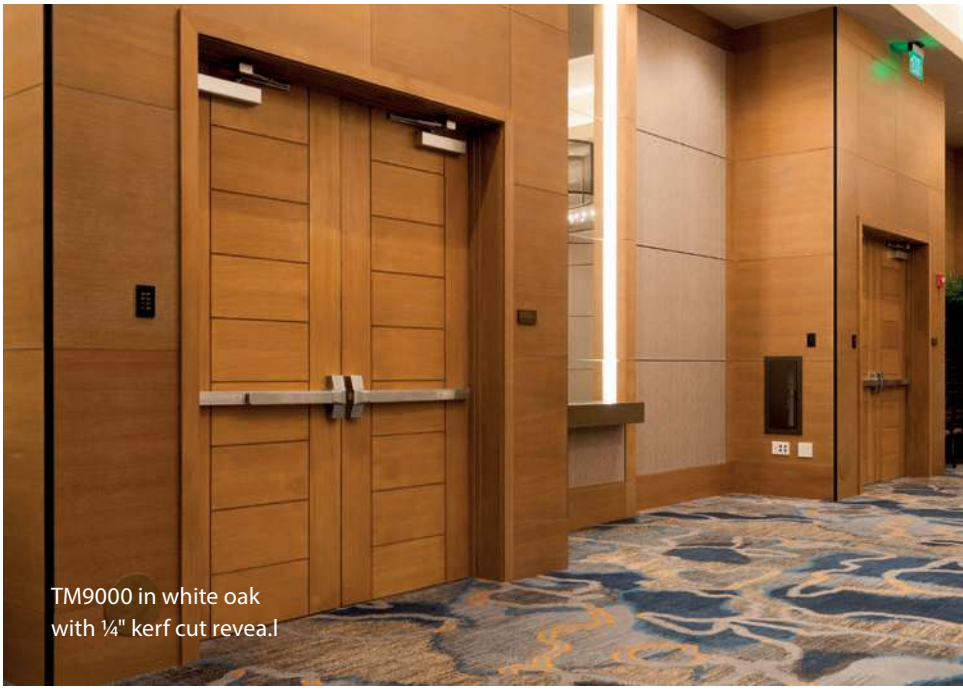

TruStile doors can be built to meet any commercial specification — including 20- through 90-minute fire ratings, ADA requirements and sound ratings.

Design Consistency Regardless of Function

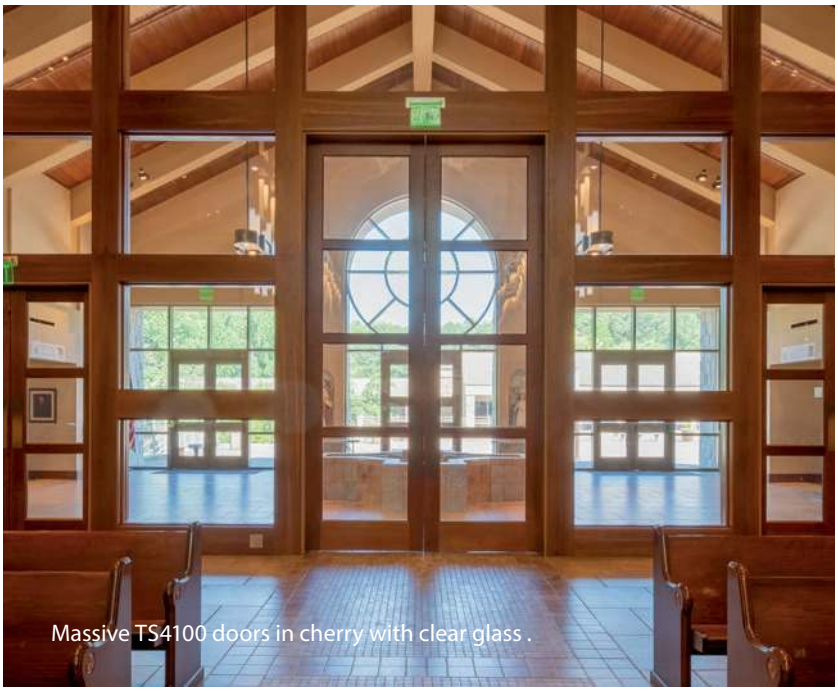

Providing ultimate design flexibility, TruStile offers a spectrum of products for every project application. Whether passage, glass, fire or sound doors, TruStile allows you to maintain design consistency across all of your openings.

Design that Complements the Planet

Our modern, domestic plants use lean manufacturing practices to make extremely efficient use of our raw materials. This minimizes waste and environmental impact.

TM9320 barn door in MDF with Brushed glass.

63% Recycled MDF Doors for Painted Applications

TruStile MDF doors are not only the highest quality paintable doors on the market, they are also the responsible environmental choice. We recycle MDF waste, donating it to agricultural partners who use it to create energy, reducing both landfill waste by 63% and waste pick ups, putting fewer trucks on the road. The green benefits of our MDF doors include:

- Certified by SCS Global Services to be constructed of 63% recycled content.
- Eligible for up to three LEED® credits
- Manufactured with low-emitting adhesives and coated with low-emitting primer.
- Standard MDF is low emitting, meeting CARB (California Air Resources Board) requirements.
- A no-added formaldehyde MDF option is also available.

CERTIFIED RECYCLED CONTENT ® SCS GLOBAL SERVICES

Use TruStile on Your Next LEED® Certified Project

The LEED® (Leadership in Energy and Environmental Design) Green Building Rating System is a national standard developed and published by the U.S. Green Building Council (USGBC). Its purpose is to promote sustainable building that is environmentally responsible, profitable and healthy. TruStile doors also qualify for other green building rating systems. Contact us for details.

TruStile doors help achieve LEED v4.0 & v4.1 Building Design and Construction credits in the following categories for new commercial construction and major renovation projects:

Material and Resources (MR) and Environmental Quality (EQ) Credits:

LEED credit	LEED criteria	TruStile MDF	TruStile Wood
MR Credit: Environmental Product Declarations (EPD)	Product-specific EPD with third-party certification (Type III), including external verification and external critical review	EPD Available	Not Eligible
MR Credit: Building Product Disclosure and Optimization – Sourcing of Raw Materials	Leadership Extraction Practices: Extended Producer Responsibility; Bio-based Materials; Material re-use; Recycled Content; FSC Certified Wood	Recycled Content	Not Eligible
EQ Credit: Low-Emitting Materials	Composite Wood Certified as ULEF or NAF per TSCA, Title VI, or CARB ATCM	ULEF & NAF Available	ULEF Available

TruStile doors help achieve LEED v4.1 Residential Single Family Home credits in the following categories:

Material and Resources (MR) and Environmental Quality (EQ) Credits:

LEED credit	LEED criteria	TruStile MDF	TruStile Wood
MR Credit: Environmental Preferable Products	The product contains at least 25% post-consumer or 50% pre-consumer recycled content; Wood products must be FSC certified	SCS certified 63%	Not Eligible
EQ Credit: Low-Emitting Products	Composite wood certified as ULEF or NAF per TSCA, Title VI, or CARB ATCM	ULEF & NAF Available	ULEF Available

Fire-Rated Doors

Our Fire Doors Are as Stylish as They Are Safe

Designed to match non-rated doors, all TruStile fire doors feature full panel relief and are carefully engineered to complement our non-rated doors.

20-minute fire-rated TS3070 in MDF.

Matched Dimensions

Stile and rail dimensions can be matched between standard and fire-rated doors.

Profiles on fire-rated doors have true depth and definition, not plant-on mouldings.

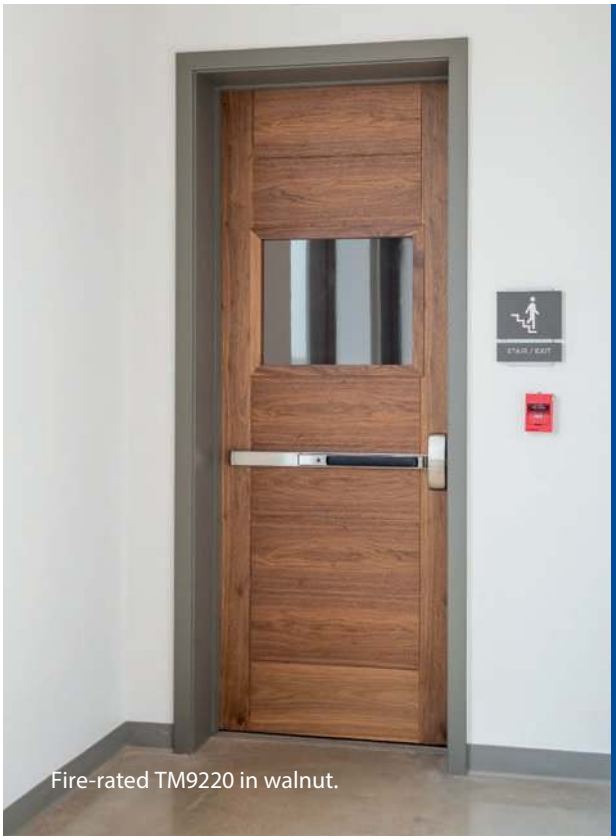

Non-rated TS3070 in MDF.

Certified Fire Door Ratings

Throw away the preconception that you have limited design options for fire-rated openings. With most of our standard panel doors available in up to 90-minute ratings, you never have to sacrifice style when selecting 20- through 90-minute fire doors.

	20-minute MDF	20-minute Wood	45- and 60-minute MDF/Wood	90-minute MDF/Wood
Category	Category A Category B Neutral Pressure	Category A Category B Neutral Pressure	Category A Category B	Category A Category B
Thickness	1¾" minimum	1¾" minimum	1¾" minimum	1¾" minimum
Maximum width single	4'0"	4'0"	3'6"	3'6"
Maximum width pair	8'0"	8'0"	7'0"	7'0"
Maximum height	8'0"	8'0"	8'0"	8'0"
Maximum fire glass area	3,145 sq. inches	3,145 sq. inches	1,248 sq. inches – 45 minutes 1,216 sq. inches – 60 minutes	1,216 sq. inches
Standards	ASTM E-152, NFPA 80, NFPA 252, UL10B, UL10C			

Some door styles and panel profiles are not available in all fire ratings. Verify availability with TruStile.
Some ratings require metal vision kits.

Fire-rated TM9220 in walnut.

Fire-Rated Glass Doors Also Available

Glass doors are the perfect solution for spaces where a fire door is required by code, but the look of a glass door is preferred. Select from over 120 fire-rated glass doors styles.

Refer to the fire-rated symbol in the Door Collections section to see which glass door designs are available in 20-, 45-, 60- and 90-minute fire ratings.

Hose stream-approved glass can also be specified.

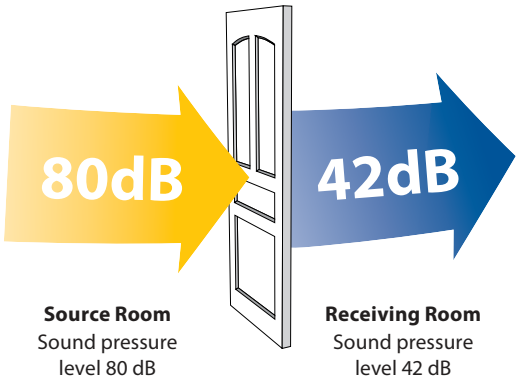

Superior Sound Performance

Noise is an inescapable component of life in the modern home. Because of their weight, solid construction and high density, TruStile doors are the ideal solution to sound proofing a home.

Home theater featuring TS3070 in mahogany with custom porthole window.

Sound ratings are classified by an STC (sound transmission class) number that rates a material's ability to resist airborne sound. A higher STC rating blocks more noise from transmitting through a partition like a door. Standard TruStile MDF doors achieve up to a 34 STC rating, some 10- to 15-points better than typical hollow-core doors that achieve a "very poor" rating.

For openings requiring even better sound performance, TruStile can provide wood and MDF doors that achieve up to a 38 STC rating.

Sound Transmission Class (STC) Ratings

TruStile has tested its sound doors in operable openings with Zero International sound gasketing packages.

STC Rating	Door Material	Door Styles	Door Thickness	Primary Seal	Secondary Seal	Threshold Saddle	Sweep
Zero International hardware used							
38	MDF	90-Minute Fire Door	1-¾"	#188FS	#118B	Flat Surface	#369
34	MDF	TS5XXX through TS9XXX	1-¾"	#475	#119	#564	#367
33	MDF	TS1XXX through TS4XXX	1-¾"	#475	#119	#564	#367
32	MDF	TS5XXX through TS9XXX	1-¾"	#475	None	#564	None
32	Wood	TS1XXX through TS4XXX	1-¾"	#475	#119	#564	#367
30	MDF	TS1XXX through TS4XXX	1-¾"	#475	None	#564	None
30	Wood	TS5XXX through TS9XXX	1-¾"	#475	#119	#564	#367
30	Wood	TS1XXX through TS4XXX	1-¾"	#475	None	#564	None

Sound Transmission Class (STC) Examples

TruStile Advantage	STC	Performance	Description
	50 – 60	Excellent	Loud sounds heard faintly or not at all
	40 – 50	Very Good	Loud speech heard faintly
TruStile Door with Recommended Gasketing	35 – 40	Good	Loud speech heard but hardly intelligible
	30 – 35	Fair	Loud speech understood fairly well
	25 – 30	Poor	Normal speech understood easily and distinctly
Typical Hollow-Core Door	20 – 25	Very Poor	Low speech audible

Design Tools

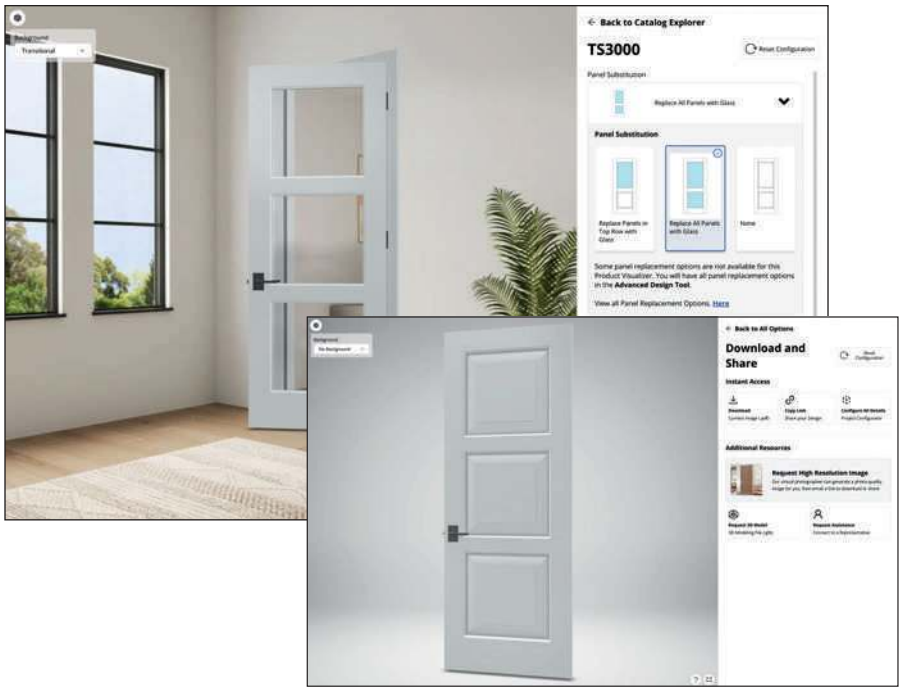

Design, Configure and Visualize Your Projects

Door Visualizer

Imagine the possibilities for your home with the TruStile Door Visualizer. Customize your door's style and materials and see changes in real-time.

Share a link to your configured door with others or download a PDF tear sheet, high resolution image or 3D model for use in modeling programs.

www.trustile.com/visualizer

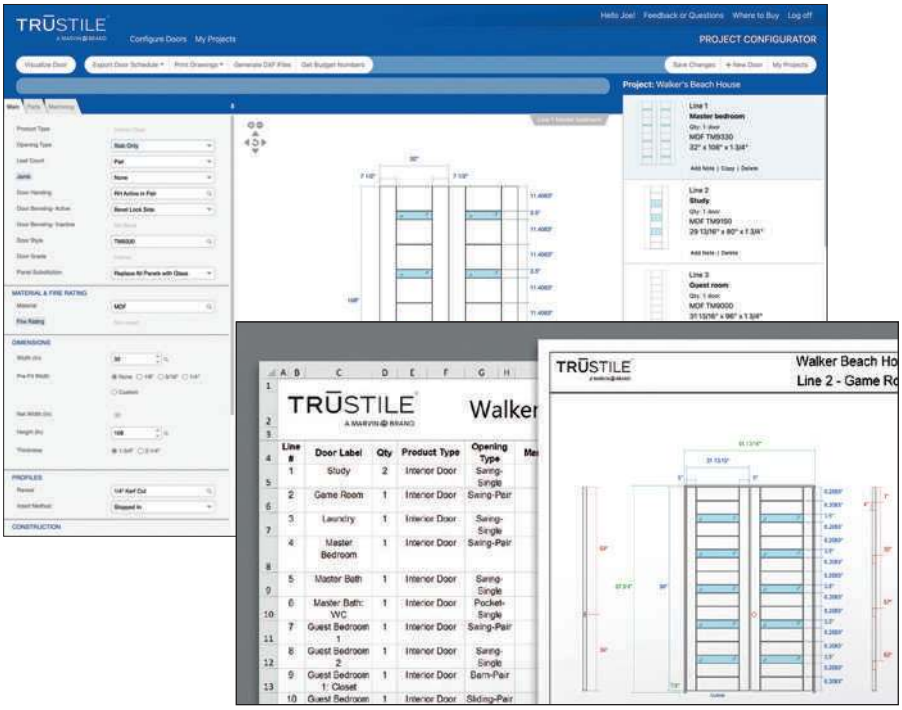

Project Configurator

Design your own door package. Specify the height, width and location of all components within a door and save to a project.

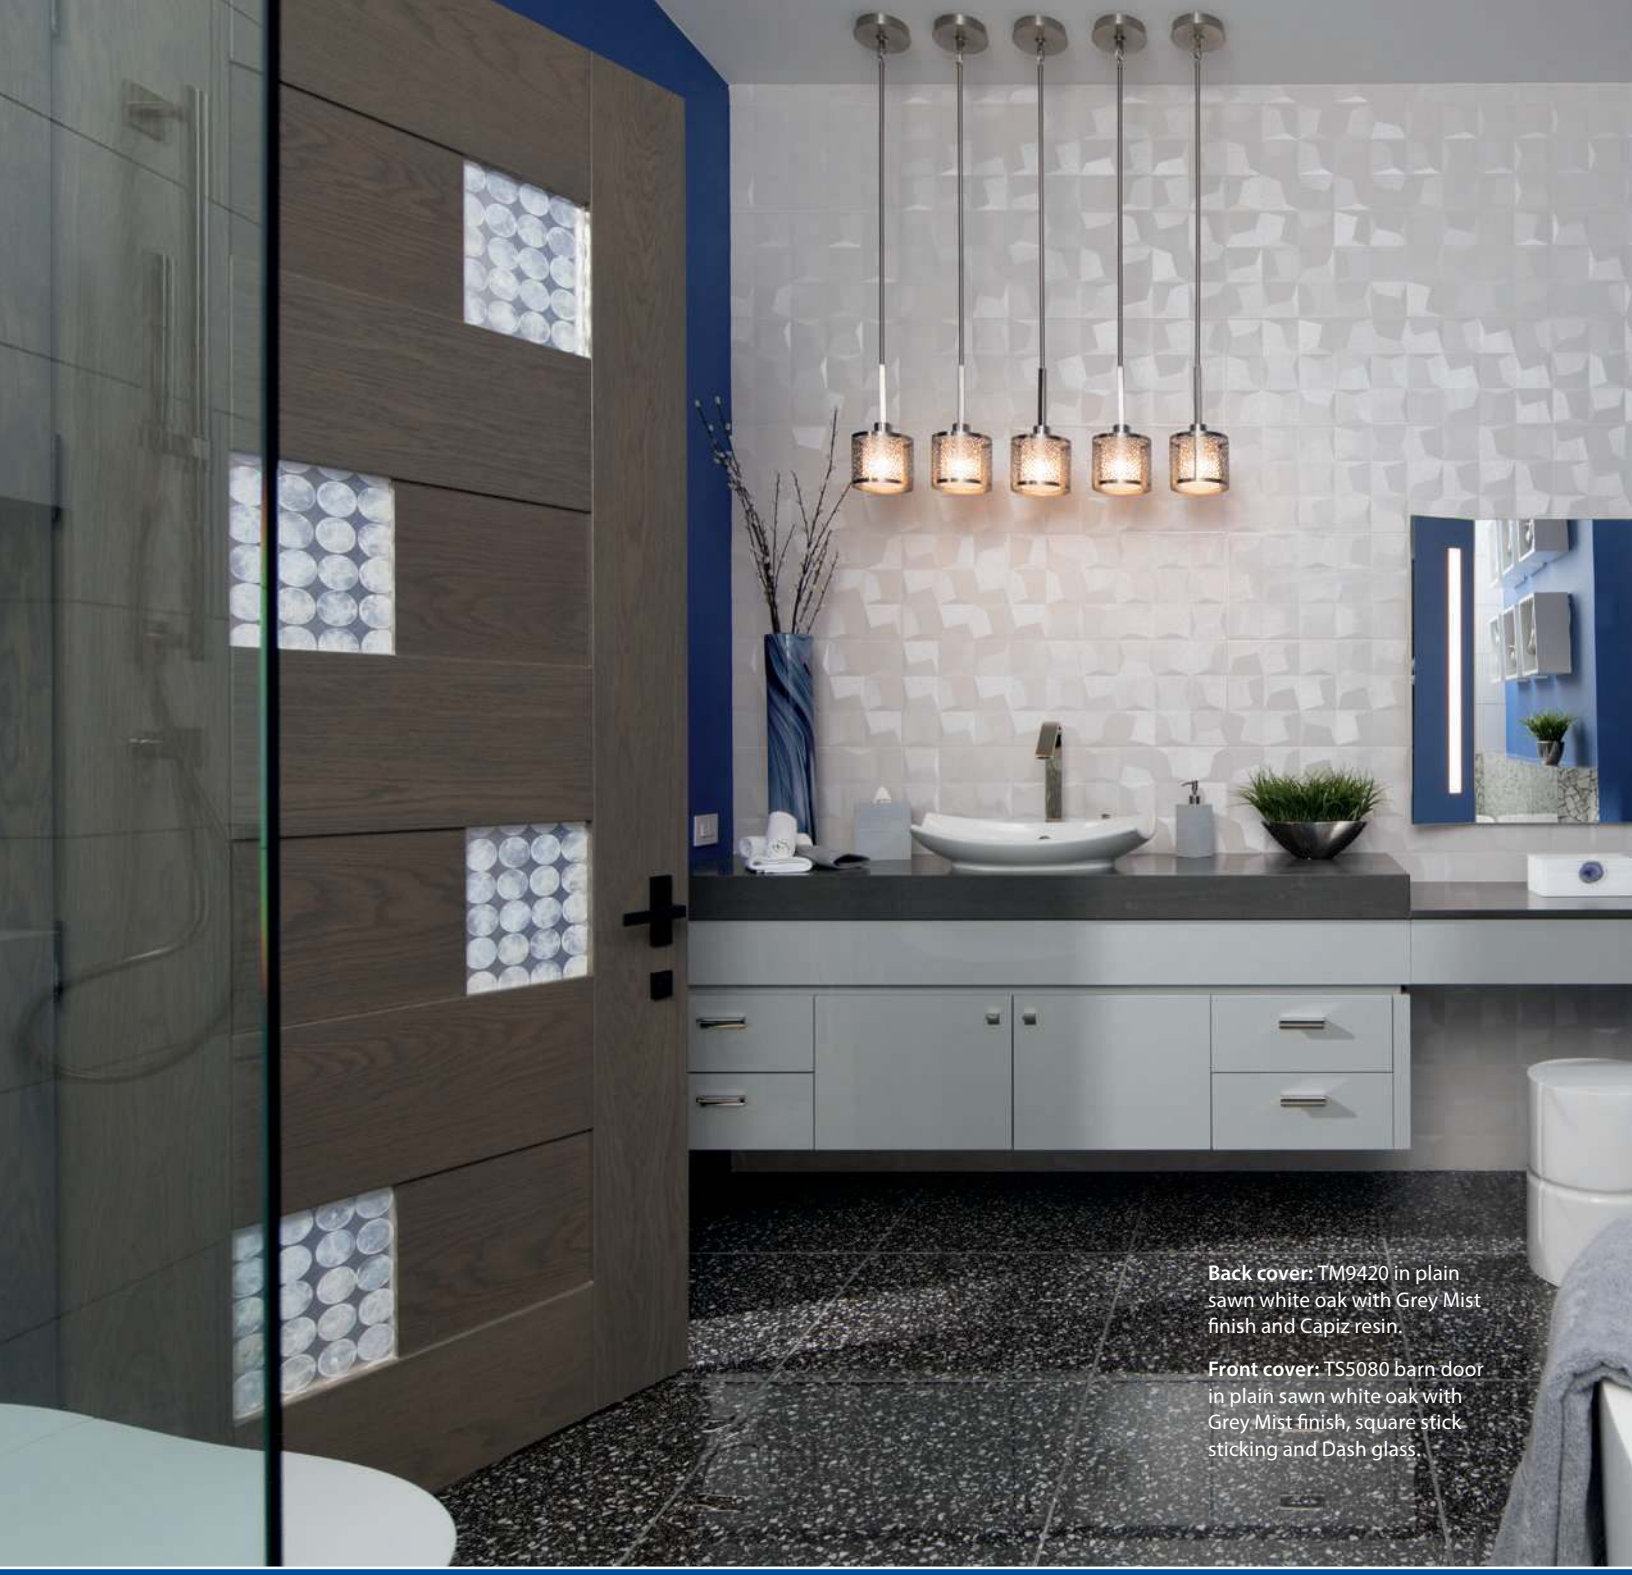

Project Configurator projects can be exported as a door schedule that opens directly in Microsoft® Excel, as a PDF of drawings or CAD models to import directly into your plans.
