ROGUE VALLEY DOOR

AMERICA'S LARGEST BUILDER OF WOOD DOORS

In 1985, John Dunkin and his team of designers and craftsmen began creating custom doors and entrances in Grants Pass, Oregon. The goal was not only to offer a top-quality product, but also doors that were expressions of their customers' unique tastes. Drawing inspiration from the natural beauty of Southern Oregon's majestic scenery, Rogue Valley Door quickly built a reputation by combining innovation and artistry with highly crafted precision.

Since then, Rogue Valley Door has grown into America's largest builder of wood doors. Today, our master craftsmen utilize the finest American materials, state-of-the-art milling technology and our 450,000 square foot facilities to produce the best doors in the world. We invite you to review our collection, experience our tradition and create your own vision for your home.

Door 4661-V, Side Lite 4705 and Transom 6705 all shown in Fir (stained)

DOORS THAT MAKE YOUR HOUSE A HOME

Our passion for doors is built into every one we create. Driving this passion is our belief that the entrance to your home is its true center.

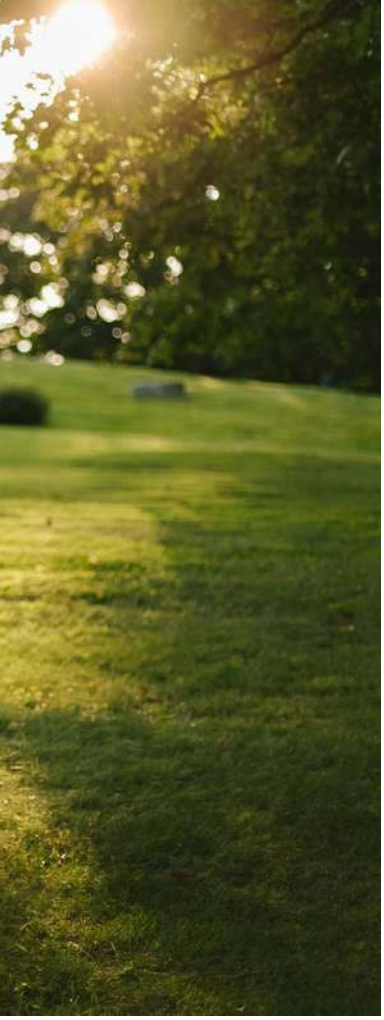

It's the gateway from which we greet and send off the friends and family we care about the most. When we've traveled a great distance, it's those last few steps we take to the front door that draws that adventure to a close. And when the kids come home from college the moment they step through that doorway means they're truly home.

We know the great and the everyday moments in the lives of our friends and customers are enriched as they pass through the doors we create. Because it's those doors that transform your house into a home.

WHAT MAKES ROGUE VALLEY DOOR DIFFERENT

We're America's largest builder of wood doors for a good reason. We pride ourselves on making the best American wood doors using the finest lumber available. We're committed to responsible environmental practices and sustainable forestry management.

Made in the U.S.A.

Our doors are proudly made in America using only domestically manufactured components.

Variety of Woods

We offer over 40 wood species to choose from, including doors constructed of multiple woods – finished, stain-ready or primed to paint.

Fire Doors

Available in a variety of species, we make fire doors with 20, 45, 60 and 90-minute fire resistance ratings.

Substantial Veneer

While a majority of imported doors use veneers as thin as 1/50 of an inch, Rogue Valley Door uses nothing less than sturdy 1/16-inch veneer on all stiles and rails.

Express Program

When you need a custom door quickly, we can have it ready to ship in 7 days with our Next Week Express, or 14 days with our Economy Express. (Some restrictions may apply.)

Variety of Glass

Rogue Valley Door gives you a choice of 19 different glass treatment options and custom etched glass.

Pre-Hanging & Machining

We provide pre-hanging and machining of fire doors, shaped doors, radius top doors and more.

CAD Drawings

A valuable tool for architects, interior designers and homeowners, Rogue Valley Door offers CAD drawings to assist with engineering plans.

Specialty Millwork

We offer specialty millwork from matching species to complement your custom door, frames, shelves, transoms and more.

Door 4631 (with Small Block Dentil Shelf) shown in Fir

HANDCRAFTED FOR YOUR HOME

CHOOSE YOUR PERFECT DOOR

Selecting just the right doors for your home has never been easier.

Although the selection of doors in this catalog is extensive, it doesn't begin to illustrate all of the possibilities. That's for you to decide. Whether you're interested in combining different wood, substituting glass for wood panels, need fire-rated doors, or simply want us to make a great door even better, we make the process easy.

Door 4030 shown in Mahogany with Square Sticking

USING OUR CATALOG

Throughout our catalog, we've placed icons next to each door to note your available options. When you see a door you like, come back to this guide for easy reference.

4962-A

Fir with Traditions Glass and Patina Caming in Flat Panel with Small Block Dentil Shelf

Premium Options

Make a great door even better with Rogue Premium Options. Our flagship collection of upgrades sets new standards in quality by combining the finest materials and construction techniques to bring you unsurpassed durability and lasting beauty.

Premium Plus

Rogue Premium Plus Doors set new standards in durability and long-lasting beauty. We back our Rogue Premium Plus solid wood options with a limited 5-Year No Overhang Warranty, available in Pine, Fir, or Primed to complement your home design.

All Sizes

From grand entryways to small closets, Rogue Valley Door can create a door to fit any application. Combine that with the ability to design custom shapes, and there's no door we can't build.

All Glass Types

Bring in the light with our great selection of clear, opaque, etched or textured glass treatments. Any panel from our wood door designs can be replaced with your choice of glass.

All Wood Species

Choose from dozens of species to find the right look and feel for your home. Or, combine complementary or contrasting wood in one door to make a bold and stylish statement.

Fire-Rated

Rogue Valley Door provides exterior and interior fire doors with a 20, 45, 60 or 90-minute fire rating. Our fire-rated doors match their counterparts visually, while complying with all code requirements.

Impact-Rated

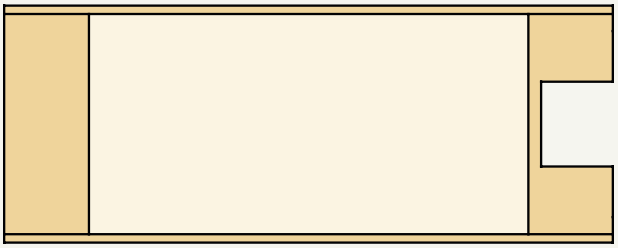

Our Impact-Rated Doors and glass can meet high-wind and coastal region codes and regulations, offering handsome looks and excellent performance during severe weather conditions while providing your home with greater protection.

ROGUE PREMIUM OPTIONS

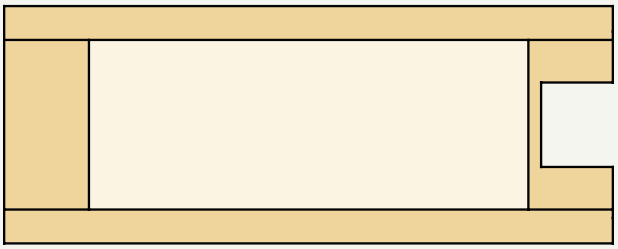

Look for the light orange square for Rogue Premium Options because they set new standards in durability and long-lasting beauty. Combining superior materials, state-of-the-art construction and unsurpassed craftsmanship, Rogue Premium Options provide enduring elegance. Designed to stand up to both Father Time and Mother Nature like no other door, we back our Rogue Premium 1/4-inch veneer and solid wood options with a limited 5-year warranty. Select a great door. Then, make it even better with your choice of our Rogue Premium Options.

Thicker Veneer Option

Many door companies build their doors with paper-thin veneer. At Rogue Valley Door, we use nothing less than 1/16-inch, which provides excellent strength, look and feel. We believe anything less runs the risk of veneer bubbling, core bleed through or separation over time. With our Rogue Premium Thicker Veneer Option choose from a substantial 1/4-inch thick veneer or a solid door made from two pieces of laminated lumber. These sturdier options provide superior resistance to inevitable wear and tear. If a compression or scratch occurs, our thicker veneers make for a much easier repair.

Our 1/16" Veneer

Rogue Premium 1/4" Veneer

Stain Grade Option

When you order the Rogue Premium Stain Grade Option, you can rest assured that you're getting the finest cut of veneer possible. The wood for these doors is hand-selected to be flawless and free of all imperfections. If knots are not a characteristic of the wood, we won't use it. If there are abnormal color variations or streaking in the grain, it won't make the cut. The doors you choose are uniquely yours by design. With our Stain Grade Option, you're ensured that the wood will be as aesthetically pleasing as the door you created.

Rogue Premium Solid Wood

Color Match Option

When you choose the Rogue Premium Color Match Option, we hand-sort the lumber and veneer to achieve an even and uniform color from one component to the next. This process will ensure that your beautiful new door will have the consistent color that you were looking for. The Rogue Premium Color Match Option gives you the flexibility to design your perfect door. Please consult your Rogue Valley Door representative regarding species availability.

ROGUE PREMIUM OPTIONS

Door 4912 and Side Lites 4901-C all shown in White Oak with Traditions Glass
See page 95

Face Pin Inlays Option

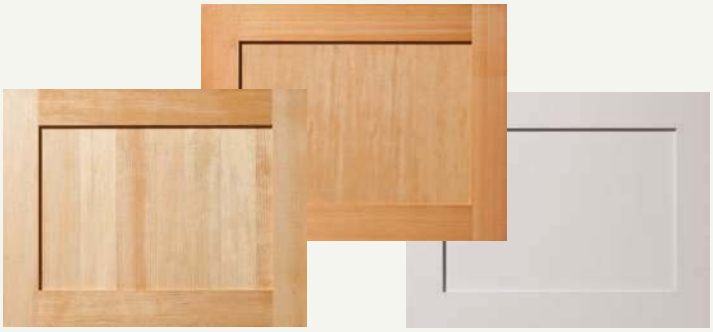

Our stile and rail doors are built using classic cope and stick construction. This time-tested design combined with modern construction techniques provides unsurpassed strength and stability. Because we use a 5/8” x 5” fluted dowel to pin critical joints, it is no longer necessary to use mortise and tenon joints with face pins. But our customers have found that our Rogue Premium Face Pin Inlays Option provides an aesthetically pleasing authentic look. Using both round and square face pins, we provide another option that reflects a level of craftsmanship that never goes out of style.

ROGUE PREMIUM PLUS

Rogue Premium Plus door designs are marked with a dark gray square. Because when your home needs high performance wood doors for tough conditions, Rogue Premium Plus Doors set new standards in durability and long-lasting beauty. Plus, we back our Rogue Premium Plus solid wood options with a limited 5-Year No Overhang Warranty.

Rogue Premium Plus Doors set new standards in durability and long-lasting beauty. Combining superior materials, state-of-the-art construction and unsurpassed craftsmanship, Rogue Premium Plus Doors provide enduring elegance. Designed to stand up to both Father Time and Mother Nature like no other door, we back our Rogue Premium Plus solid wood options with a limited 5-Year No Overhang Warranty. Select a great door. Then, make it even better when you upgrade to a Rogue Premium Door.

Available in Pine, Fir and Primed

Three Species Options With No Overhang Requirements

Our high performance doors are available in Pine, Fir, or Primed to complement your home design. And because of Rogue Premium Plus durable construction, there are no overhang requirements. Upgrade to a Rogue Premium Plus Door, and you can feel confident your door will look great and hold up under the toughest conditions.

Solid Wood

With our Rogue Premium Plus option you will receive a solid door made from two pieces of laminated lumber. This sturdier option provides superior resistance to inevitable wear and tear. If an impression or a scratch occurs in the door, our solid wood option allows for a much easier repair. And with the Rogue Premium Plus durable construction, there are no overhang requirements.

Rogue Premium Solid Wood

The Rogue Premium Plus 5-Year No Overhang Guarantee

5 YEAR NO OVERHANG GUARANTEE

We back our Rogue Premium Plus Doors with a limited 5-Year No Overhang Warranty so you can be assured of a lasting value. Ask your Rogue Valley Door representative today for all the details on our limited 5-Year No Overhang Warranty.

Note: Rogue Premium Plus Doors are designed for exterior door applications. Doors with glass designs should be specified Insulated Glass (IG) only.

ROGUE PREMIUM PLUS

Door 4612 and Side Lites 4661
all shown in Fir with Flat Panel
See page 66

A Solid Wood & Lag Bolt Construction Make Premium Plus Our Most Durable Door

Rogue Premium Plus Doors are assembled with our standard 5/8” x 5” hardwood dowel pins.

Then, for added strength and protection to the top and bottom rail joints, we apply additional glue and secure those joints with a 3/8” x 6” steel lag bolt.

ALL SIZES

Door designs marked with an olive green square indicate the door is available in All Sizes. Because Rogue Valley Doors come in all sizes, from up to 2¼" thick, to 8' wide, to 14' tall. Just let us know how we can build the perfect door to fit your needs.

Entries Come in All Shapes and Sizes

Whether it's the main entrance to your home or a unique closet space, Rogue Valley Door provides an array of door sizes and thicknesses. From dozens of wood species and glass doors in a myriad of treatments, to French doors, fire-rated doors and even louvered doors, we can create them in any size to fit your specifications. We also build custom interior and exterior doors to accommodate any shape. If you're building or remodeling, add character to your home with one-of-a-kind doors fashioned to fit your personal taste.

Rogue Valley Doors come in all sizes, from up to 2¼" thick, to 8' wide, to 14' tall.
Just let us know how we can build the perfect door to fit your needs.

ALL GLASS TYPES

The sea blue square lets you know the door design is available in All Glass Types, so you can choose from any of our Standard Glass Options below. Bring light into any room with our imaginative array of glass treatments for both entry and interior door designs.

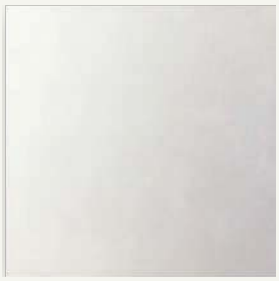

Standard Glass Options

From tinted to opaque to textured, Rogue Valley Door gives you a choice of 19 stylish glass options for just the right look.

White Laminate

This safety glass is made by sandwiching a white film between clear panes.

Satin

Light and privacy combine in this translucent, semi-opaque glass treatment.

Clear

A clear pane of glass that provides classic, transparent simplicity.

Grey

A clear glass treatment with a subtle grey hue that is fully transparent.

Delta Frost

A fairly opaque, frosted glass treatment with a unique, random texture.

Rain

A vertical treatment resembling raindrops that is fairly opaque.

Seedy Baroque

Clear glass with a scattered look, baroque wash and asymmetrical curves.

Bronze

A clear, mostly-transparent glass with light bronze undertones.

Reeded*

An elegant vertical line treatment that is fairly transparent.

Bevel

A clear, tempered glass with a striking beveled edge.

Evergreen

A clear glass treatment with subtle green highlights that is mostly transparent.

Obscure-P516

A pebbled or “orange peel” treatment that is mostly opaque.

ALL GLASS TYPES

Glue Chip

A stylish frosted treatment that is fairly opaque.

Monumental

A semi-transparent with a distinctive pattern offers privacy and natural light.

Solar Bronze

A mirrored exterior effect that provides a clear, bronze-tinted view from inside.

Sycamore

Leaf impressions offer soft obscurity while allowing an abundance of light to travel throughout the room.

Taffeta

Reminiscent of fabric, this radiant glass offers privacy without obscuring natural light.

IG w/ Bronze GBG

Insulated glass divided by a bronze internal grid to simulate a door with multiple lights.

IG w/ White GBG

Insulated glass divided by a white internal grid to simulate a door with multiple lights.

**These glass options are NOT recommended for Multi Light Doors.*

ALL WOOD SPECIES - STANDARD

The mustard yellow square means the door design is available in All Wood Species. So you can choose from our line of standard wood species to best suit your style. From the country charm of Knotty Pine to handsome Dark Walnut, Rogue Valley Door uses only the finest lumber.

Standard Wood Species

Choose from our range of 14 standard wood species. Our standard selection of wood species provides a palette of stunning colors and textures, each with its own distinctive character. If you have a different type of wood species in mind, please see the following pages for our specialized wood species or contact your Rogue Valley Door representative for more wood species ideas.

FIRE-RATED

Look for a brick red square under door designs for fire-rated doors. Rogue Valley Door provides exterior and interior fire doors with a 20, 45, 60 or 90-minute fire rating on our most popular styles, including up to 3/6 x 8/0 single doors or 7/0 x 8/0 double doors.

Doors play an important role in limiting the danger and damage from fires. At Rogue Valley Door, we not only take great pride in meticulous craftsmanship and artistry, but also in building doors that provide you with today's most advanced fire safety standards.

Our most popular door styles - including up to 3/6 x 8/0 single doors or 7/0 x 8/0 double doors - can be built to comply with all fire code requirements. By constructing doors with 20, 45, 60 or 90-minute fire ratings and beautiful, substantial veneers, we're proving that safety and style come together beautifully.

CUSTOM DESIGNED DOORS

MADE ESPECIALLY FOR YOU

Explore the countless possibilities with interior and exterior doors, which can be customized especially for you. With expertise, innovation and detail, we build custom door solutions for people like you who desire grand sizes, imaginative shapes and styles, and superior performance. Rogue Valley Door can custom build almost any door you desire including multiple species, carved, etched and custom shapes.

WE CAN BUILD PRACTICALLY ANY DOOR YOU CAN IMAGINE

Your home reflects your lifestyle. From outdoor landscaping to interior design, your imagination is what turns a house into a home. Enhancing it with custom doors makes a bold statement and puts the finishing touches on your creation. Considering Rogue Valley Door offers a multitude of custom styles and shapes using a wide variety of wood species and glass treatments, the possibilities are endless. Whether you're an architect, a builder or a homeowner, we offer not only the finest wood doors available, but also the opportunity for you to design your own. If you can imagine it, we can build it.

When you partner with Rogue Valley Door, our goal is to excite, inspire and provide you with the creative tools to design doors as unique as you are. From initial sketches, we generate a precise CAD drawing. From there, the design is sent along to our craftsmen. With great pride and attention to detail, we incorporate the materials you choose, build it to your precise specifications and have it ready to ship within weeks. To explore the possibilities and see how simple we make the process, visit us at www.roguevalleydoor.com and click on Door Builder.

PIVOT DOORS

Rogue Valley Door is proud to add Pivot Doors to our Urban Door Collection.

The modern pivot door is one of today's best door trends. So Rogue Valley Door has expanded our popular line of contemporary Urban door designs to include pivot doors. These doors feature the unique pivoting functionality plus a modern style that will make your home's entryway unique.

The large-scale, floor-to-ceiling doors pivot on an axis instead of opening and closing from a wall-mounted hinge making this door design perfect for entryways where you need a very large door. Pivot door designs are the epitome of cool, urban style.

Above right, Pivot Door 4077-G (4/0) shown in Fir
See page 57

Pivot Door 7006-H 4/0 x 8/0 shown in Fir with Black Metal Inlays
See page 57

SG: Single Pane Glass **IG:** Insulated Glass

Our pivot door design and construction produces no visible frame hinges, but rather an invisible vertical axis which allows the choice to setup the door to open inwardly or outwardly.

Also, Rogue Valley Door can custom design and build a pivot door especially for your home, making it a one-of-a-kind. Contact your Rogue Valley Door representative today to learn more.

TRADITIONAL

Traditional design meets uncompromising craftsmanship in the Rogue Valley Door Traditional Door Collection. When it comes to lasting style and appeal, traditional door styles can be your best choice to create a magnificent first impression. Alluring and enduring, these classic doors are built to stand up to the elements just like the designs have stood the test of time.

DECORATIVE

Choose from our collection of beautifully created decorative doors. From stately elegance to artistic expression, we blend wood, glass and caming exquisitely for an impressive welcome.

Our decorative glass doors have always been a popular choice for elegant entry doors because they add visual interest and create a beautiful design element in your home. These doors are an excellent way to customize your home, while providing privacy and sound buffering and light. All of our decorative glass designs feature caming in either Patina (black), Zinc (silver) and Brass (gold).

INTERIOR DOORS

BEAUTY WITH PURPOSE

Complement your room design with the beauty, form and function of Rogue Valley Door interior doors. An integral part of your interior design, the right interior doors can greatly enhance a room's color, furnishings and decor. They provide a first impression and a finishing touch. From the practical value and comfort of our Sustainable Designed Fiberboard (SDF) doors to rustic, grooved-panel or traditional designs, Rogue Valley Door offers the perfect interior options for any application.

SLIDING BARN DOORS

Sliding barn doors are not just for barns anymore. Barn-style doors have come inside and are giving homeowners a fresh, new look on a classic American design.

Rogue Valley Door is bringing the charm of the great American barn and its smart, sliding barn doors into your home with our new collection of barn-style door designs.

From rustic living rooms to contemporary office spaces, our barn-style doors offer your home a unique function as well as great eye appeal. Barn door designs are also perfect as room dividers or for enclosing pantries or laundry rooms.

Functionally, our barn-style doors are big space savers because they require less space than traditional swinging doors.

INTERIOR DOORS

GROOVED PANEL

Take a classic design, add your personal touch with your choice of wood, and you have eye-catching grooved panel interior doors.

Choose from our collection of grooved interior doors which offer homeowners the unique opportunity to stamp their own personal style throughout their home.

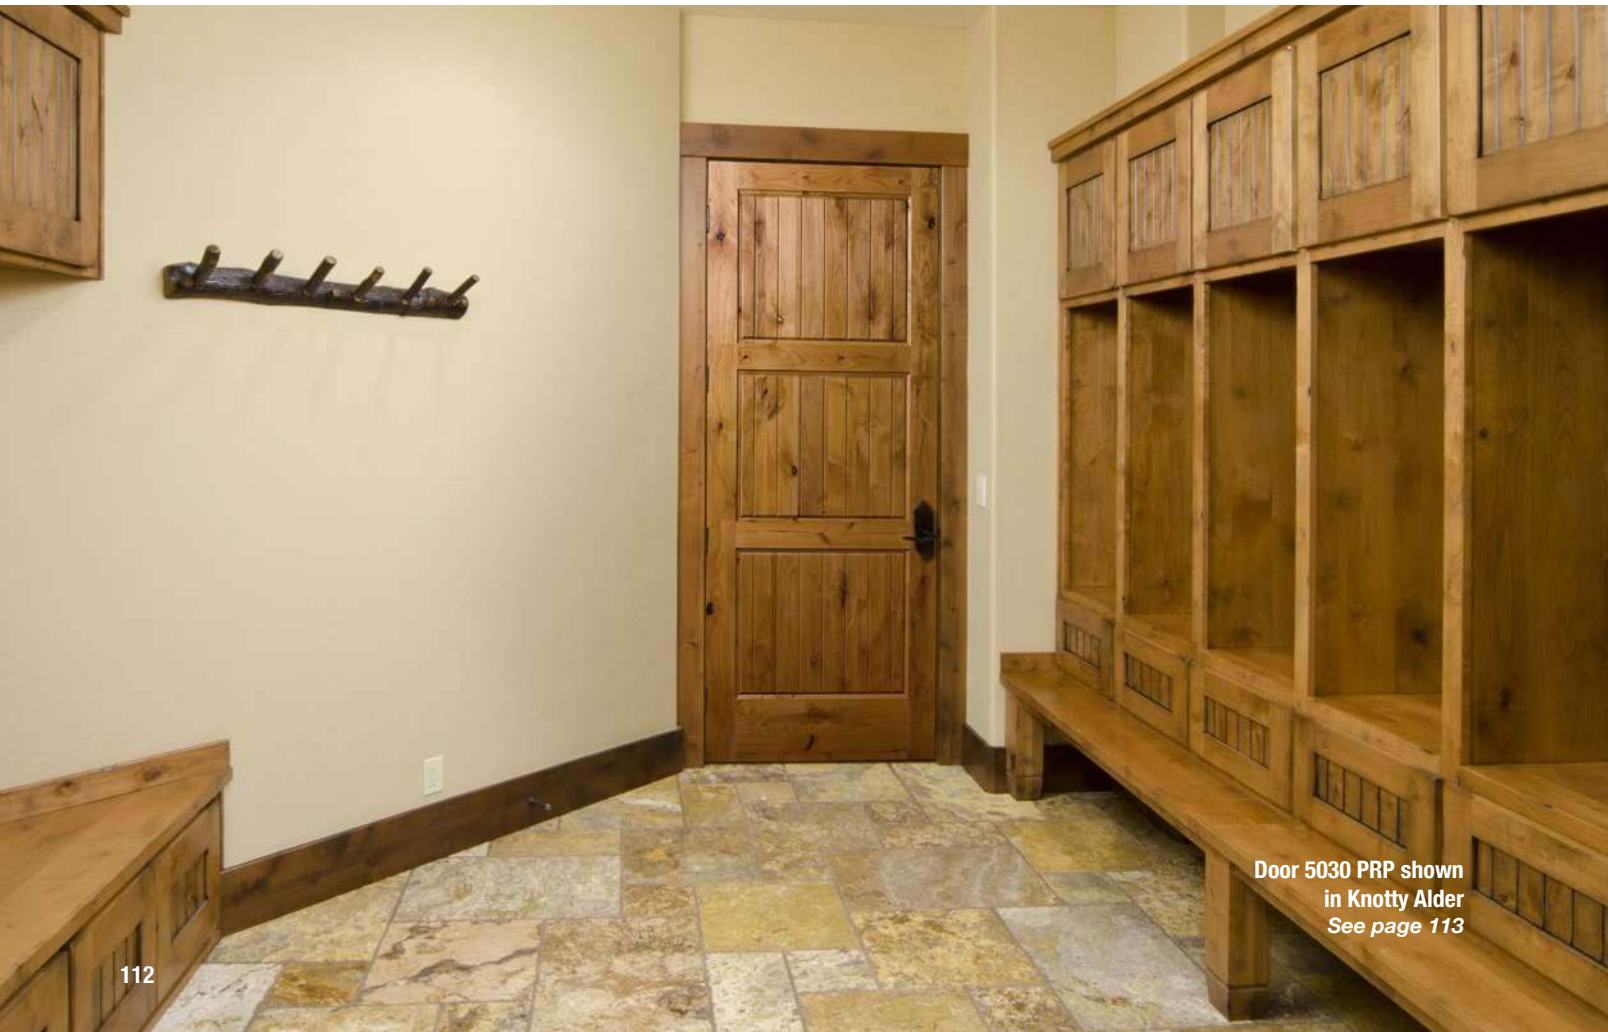

Our ever-increasing collection of designs has something for everyone, from the timeless charm of the country cottage to the contemporary designs of the modern world.

These doors are designed to look simple and elegant yet still incorporate the latest technologies to make them lighter and stronger.

FRENCH

Whether they lead into a den, bedroom or home office, interior French doors bring a unique touch of elegance to any room. Rogue Valley Door offers an extensive number of wood, glass and design options to create a dramatic entrance to any room.

Our French interior doors are one of the best ways to separate a space without eliminating the openness in your home. They provide superior insulation and protection from noise and changing temperatures. And if you want more light passing from one room to another, these doors are a great option. They feature a combination of glass panels (several treatments to pick from) and rich wood that add a sense of style and sophistication to your home.

CLOSET

If there's a category for the loneliest doors in a home, the outright winner would have to be Closet doors. We see that as an opportunity to create something special. Closet doors don't need to be ordinary. Build yours with a great selection of wood species and door designs from panel to louvered and more.

DUTCH STYLE

Bring the vintage look of yesteryear into your home with our handcrafted Dutch doors. Classic Dutch doors from Rogue Valley Door are a great option to give any room or entrance an added touch of style. These doors can act as two separate sections or easily function together as a whole. Most of our door designs can be made into a Dutch door.

The original idea of the Dutch door design was to keep farm animals out of rural homes and to keep young children inside. Also, the design allowed light and air through the open top; combining a door with a large window. When the top half of the door was open it let a breeze in the house but stopped dirt from blowing into the floors. These qualities are as smart today as when they were originally designed, while giving a home owner a classic look and feel.

CHALKBOARD

Whimsical and practical, our Chalkboard Doors add a fun touch to a pantry, kids' room, home office or wherever you might need to jot down an idea, instruction, reminder or brilliant word of encouragement. Doors are customized to fit your needs and feature either chalkboard or whiteboard treatments.

If the idea of having a chalkboard or whiteboard is fun but you lack the wall space, consider the Rogue Valley Chalkboard Doors in your home. These are beautiful doors, plus they can capture ideas, act as a calendar, or display fun artwork done by the little ones.

For style flexibility, these interior doors come in different versions applied to our full panel, two panel or three panel doors. A one panel style offers a full-length chalkboard or whiteboard panel that gives the most available "workspace". The two or three panel versions are similar to the full-length version except for a middle rail that provides chalkboard or whiteboard on top and bottom, or just on top.

ADD-ONS

Sometimes the slightest trim or accessory addition to an exterior door can be the element that sends if from a great look to something unique, compelling and noteworthy. That's where light design touches come in. Choose from a variety of these options to create your very special front door entry.

Custom Door 4662 shown in Fir with SDL Bars, Large Block Dentil Shelf and Square Sticking
See page 66

Speakeasy & Grill Accessories

Our speakeasy door grills and hinges/latch are reminiscent of the days of old school mobsters and prohibition. These accessories offer a beautiful focal point for any entryway while providing a unique and functional addition to your door.

These items add a certain rustic accent for your door while providing privacy and heavy-duty construction to help assure your personal safety in classic style.

Grills come in classic black finish and we offer dome and pyramid clavos that can be purchased with adhesive or nail backs.

No warranty against warp on plank doors.

DOOR RESOURCES

HELPFUL INFORMATION ABOUT YOUR DOORS

To ensure precise operation and long-lasting beauty, we've included these valuable reference guides to ensure your doors provide you with years of great performance.

Some of the topics include pre-hung doors and machining, millwork, sticking/panel profile options, glass care instructions, calculating door overhang, handling/installation, our Rogue Valley Door Limited Guarantee and a catalog index listing the doors in this catalog.

PRE-HUNG DOORS & MACHINING

For those applications that require limited on site installation, we offer complete machining and pre-hanging services.

Pre-Hung Doors

A door should consistently snap into place, clear its jamb, and swing effortlessly on its hinges. The fine tolerances needed to achieve this kind of performance help explain why a pre-hung door is a precision instrument. Rogue Valley Door has the capability to assemble the jambs, cut for hinges and door knobs, and pre-hang any of our doors for ease of installation. Interior doors, exterior doors, 2-1/4 thick doors, fire doors, radius doors, and clipped corner doors are just a few of the units that we can create in our shop.

Machining Services

From small residential jobs to large resort and hospitality projects, Rogue Valley Door has a complete range of factory machining services. Provide us with your machining specifications, and allow us to save you time, eliminate problems of on-site machining, and reduce your overall costs. We machine for multi-point locks from W&F and Hoppe.

Our machining services include:

- Cylindrical Lock Preps
- Mortise Lock Preps
- Electronic Lock Preps
- Hinge Preps
- Strike Preps
- Wire Chase Preps
- Flush Bolt Preps
- Concealed Overhead Door Preps
- Door Bottom Preps
- Exit Device Preps
- Multi-Point Locking Preps
- Concealed Vertical Rod Preps

HOPPE® Handle of excellence.

Endura® PERFORMANCE STANDARD

SCHLAGE®

MILLWORK CAPABILITIES

Every Rogue Valley Door, even the custom shaped doors, can have matching handcrafted millwork, an elegantly carved profile on each portion of the door, including the frame, the jamb, and the door stop. This millwork is a fantastic finishing touch and can bring together the design of every door in your home, the unifying detail of your unique style.

GLASS CARE INSTRUCTIONS

Glass Care Dos and Don'ts

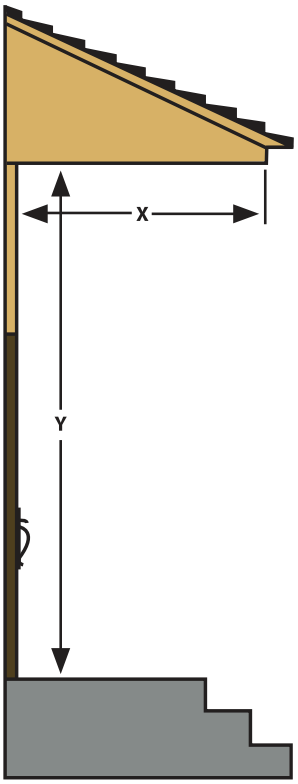

Do these things:

- Clean glass when dirt and residue appear.
- Determine if coated glass surfaces are exposed.
- Exercise special care when cleaning coated glass surfaces.
- Avoid cleaning tinted and coated glass surfaces in direct sunlight.
- Start cleaning at the top of the building and continue to lower levels.
- Apply clean water to soak the glass surface with a soap solution to loosen dirt and debris.
- Use a mild, non-abrasive commercial window cleaning solution.
- Use a squeegee to remove all of the cleaning solution.
- Dry all cleaning solution from window gaskets, sealants and frame.
- Clean one small window and check to see if procedures have caused any damage.
- Be aware of and follow the glass supplier's specific cleaning recommendations.
- Caution other trades against allowing other materials to contact the glass.
- Watch for and prevent conditions that can damage the glass.

Don't do these things:

- Don't use scrapers of any size or type for cleaning glass.
- Don't allow dirt and residue to remain on glass for an extended period of time.
- Don't begin cleaning glass without knowing if a coated surface is exposed.
- Don't clean tinted or coated glass in direct sunlight.
- Don't allow water or cleaning residue to remain on the glass or adjacent materials.
- Don't begin cleaning without rinsing excessive dirt and debris.
- Don't use abrasive cleaning solutions or materials.
- Don't allow metal parts of cleaning equipment to contact the glass.
- Don't trap abrasive particles between the cleaning materials and the glass surface.
- Don't allow other trades to lean tools or materials against the glass surface.
- Don't allow splashed materials to dry on the glass surface.

CALCULATING DOOR OVERHANG

Appropriate Overhang Calculation

Adequate overhang is very critical to the life and performance of a wood stile and rail door. A proper overhang will help protect your door from the elements and extend the life of the door. In most climate conditions the following formula can be used to determine the appropriate amount of overhang: X=1/2Y (where X is the length of the overhang required and Y is the distance from the bottom of the door to the base of the overhang.) For example, if the measurement from the bottom of the door to the base of the overhang is 8 feet, then the required overhang is 4 feet. For more severe climates, very wet or dry areas, the following formula should be used: X=Y.

Climate & Exposure

What direction does my door face, N, S, E, W? A Southern exposure can take a toll on wood exterior doors because they are exposed to sunlight most of the day. Use this handy guide that factors your local climate and the direction your door faces to suggest the right dimensions for your overhang (pictured left).

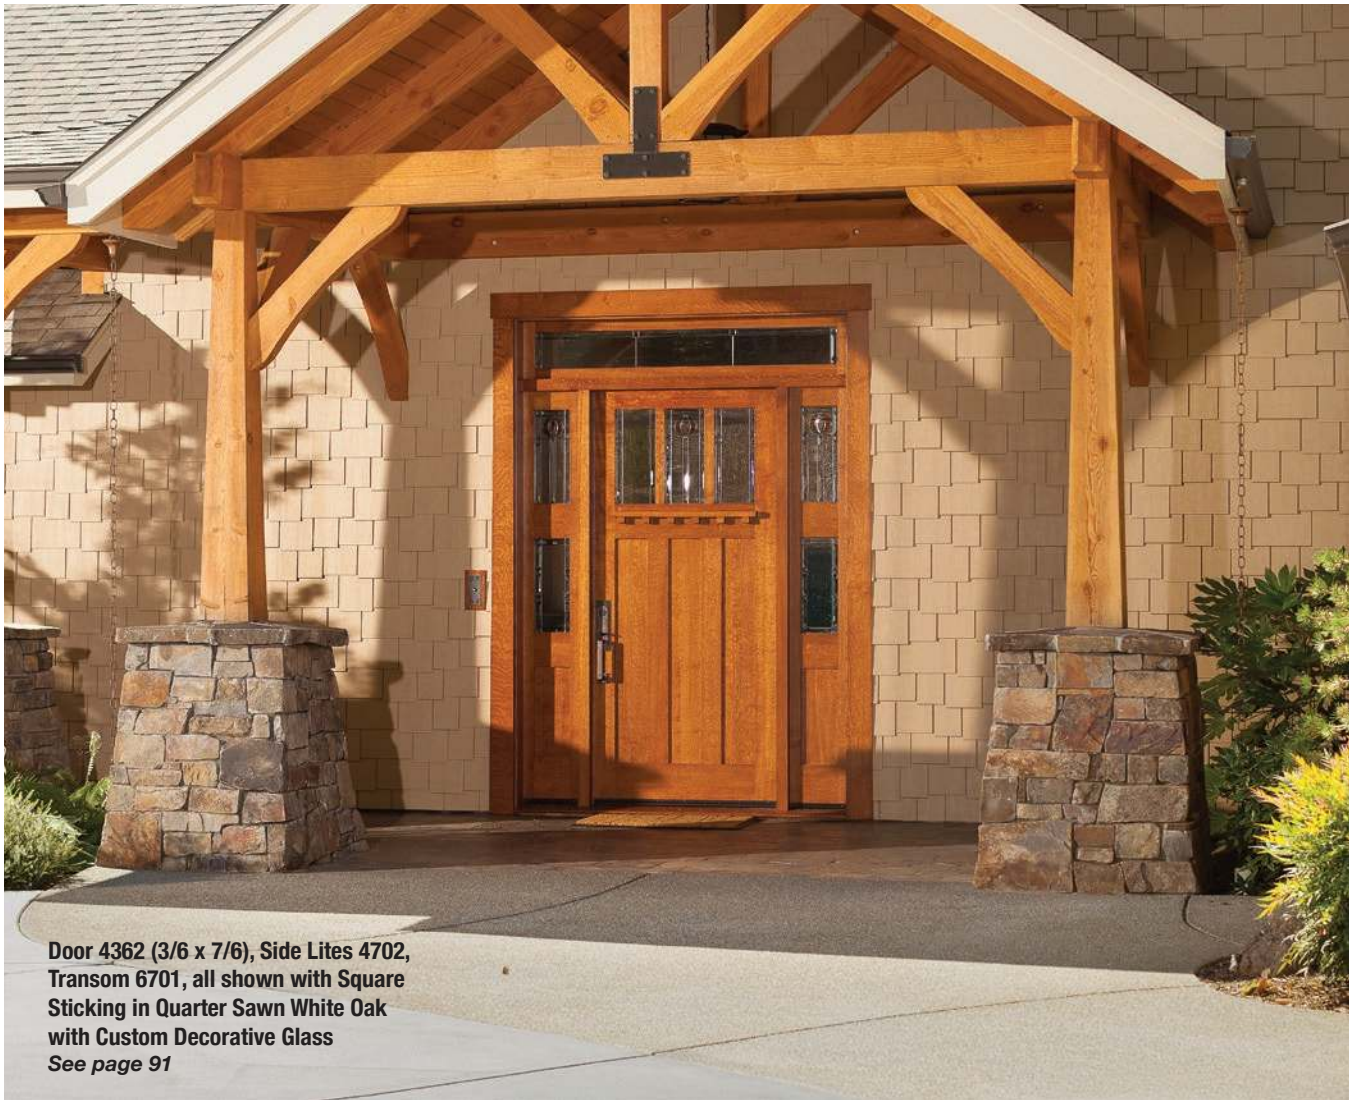

DIRECTION YOUR DOOR FACES

Climate	North	South	East	West
Desert	X=1/2Y	*Not Recommended*	X=1/2Y	*Not Recommended*
Ocean	X=1/2Y	X=Y	X=1/2Y	X=Y
Wet	X=Y	X=Y	X=Y	X=Y
Mild	X=1/2Y	X=Y	X=1/2Y	X=Y

HANDLING, INSTALLATION & FINISHING

Door 4362 (3/6 x 7/6), Side Lites 4702, Transom 6701, all shown with Square Sticking in Quarter Sawn White Oak with Custom Decorative Glass
See page 91

Wood stile and rail doors are a reflection of quality and good taste. To ensure you obtain the maximum enjoyment and utility of your door, follow the guidelines detailed below. Failure to follow the guidelines below will invalidate our Limited Warranty. It will be the discretion of Rogue Valley Door or its representative to approve or reject any claim due to poor handling, application, installation or finishing.

Door Handling Guide

1. Handle all doors with clean gloves and equipment.
2. Avoid dragging doors across one another or across other surfaces. Avoid leaning at a steep angle.
3. Store on a level surface in a dry, well-ventilated building. Avoid stacking on end.
4. Cover doors to keep clean, but allow air circulation.
5. Doors should not be subject to abnormal heat, dryness, or humidity for prolonged periods. Avoid sudden changes such as forced heat to dry out a building.
6. Deliver doors in a clean truck and under cover from wet weather.
7. Deliver doors to building site only after plaster, stucco, and/or cement is dry.
8. If the doors are to be stored for long periods or on the job site, the entire door including the top and bottom edges must be sealed in order to prevent undue moisture absorption.
9. Doors shall not be exposed to excessive moisture (above 55% RH), excessive heat (90 degrees F), and dryness (30%RH).

Door Fitting & Hanging Guide

1. All wood doors should be conditioned to average prevailing relative humidity of the locality before hanging.
2. When hanging door, allow adequate clearance for swelling of door or frame in extremely damp weather.
3. All exterior glazed doors should be hung with the removable wooden bead facing the interior side of the opening.
4. Avoid cutting doors down in size, use designated sizes. If width trim is necessary, do not trim more than ¼" per side. Top of door may be trimmed ½" and the bottom no more than 1-½". Use a sharp, fine tooth saw for best results.
5. Caution must be used to avoid impairing the utility or structural strength of the door when fitting for hardware, lites, louvers, panels, and/or any other special detail.
6. Be sure the jambs and stops are set perfectly square and plumb.
7. Immediately after fitting, cutting for closures, weather-strip and/or threshold and before hanging any interior or exterior door on the job, the entire door including top and bottom edges must be sealed to prevent undue absorption of moisture.

Door Preparation For Finishing Guide

1. Adjust or align components if necessary.
2. All doors manufactured by Rogue Valley Door require sanding prior to finishing. The degree of pre-sanding will depend upon the owner's selection of stain and whether or not they are spraying or wiping on the stain.
3. Remove all handling marks, instruction labels, stamps and effects of exposure to moisture with a thorough, final light sanding over all surfaces of the door, using 180 grit sand paper. Note: Small amounts of grease, oil or pitch can be wiped clean with mineral spirits.
4. Clean door thoroughly after sanding to remove all dust or foreign material. Avoid using chemical cleaners that react unfavorably to certain wood species and finishes. Consult a finish expert. Note: Some hardwood species can have an adverse reaction with certain chemical cleaners and finishes.
5. Apply finish as soon as door is fitted, but before final hanging. Cutouts for hardware must be sealed prior to installation. Rogue Valley Door will not warrant product that has been hung prior to finishing or that shows deterioration of wood or swelling due to finish breakdown.
6. Make sure all surfaces are sealed and finished, including top, bottom, and side edges of the stiles and rails.
7. It is the finisher's responsibility to cover the glass during the finishing process. On doors ordered with plastic film, removal of the film immediately after finishing is required. Failure to remove the film in a timely manner may result in difficulties in removing the film at a later date. Do not use razors or other sharp object to remove the film or clean the glass. These items may scratch the glass.

Exterior Door Finishing Guide

Caution: If during the finish process you are having some issues with your door, stop finishing immediately and contact the company from where you purchased the doors.

Stain & Clear Finish

The top coats should be a solvent-borne (oil-base, alkyd resin base, polyurethane resin-base) or a water-borne (latex resin-base) clear finish. The advantages of a solvent-borne clear finish is they are faster drying, harder, and more water resistance. The advantages of a water-borne clear finish is they are very flexible, ultraviolet resistance, and have good exterior durability. Note: Lacquer-base toners or finishes should not be used on exterior doors.

1. When applying stain to a door, the door should be prepped with a wood conditioner or sanding sealer prior to applying stain. Verify with the stain and top coat manufacturer's instructions. Caution: If during the finish process you are having some issues with your door, stop finishing immediately and contact the company from where you purchased the doors.
2. Doors should be sealed with at least three coats of a good quality exterior solvent-borne or water-borne clear finish.
3. Sand lightly between top coats, making sure that all surfaces and edges are covered every time a coat is applied. Clean door of dust before applying the next coat.
4. To minimize moisture penetration where wood parts or glass and wood come together, be sure enough top coat is applied to form a bridged film across any voids. Make sure that the finish does not prevent movement of the floating panels.
5. You can make sure all coatings in the finish system are compatible by using products from the same manufacturer. Finish manufacturers will be able to tell you which of their products may be successfully applied in combination with each other. Finishes should be applied in accordance with the manufacturer's instructions.
6. Dark colored stains should not be used on doors exposed to sunlight, as expansion and contraction of door components may occur.
7. A substantial overhang and protection from the elements will minimize component movement inherent in exterior wood doors.

Paint Finish

Oil-base or latex resin-base exterior grade primer and paints may be used on wood doors. Oil-base primer and paints offer more resistance to moisture penetration, and latex resin-base primer and paints will offer better durability and color retention.

1. Doors should be sealed with a good quality exterior primer followed by at least two topcoats of either an oil-base or latex resin-base exterior paint.

2. Sand lightly between coats, making sure that all surfaces and edges are covered every time a coat is applied. Clean door of dust before applying the next coat.
3. To minimize moisture penetration where wood parts or glass and wood come together, be sure enough paint is applied to form a bridged film across any voids. Make sure that the finish does not prevent movement of the floating panels.
4. You can make sure all coatings in the finish system are compatible by using products from the same manufacturer. Finish manufacturers will be able to tell you which of their products may be successfully applied in combination with each other. Finishes should be applied in accordance with the manufacturer's instructions.
5. Dark colored paints should not be used on doors exposed to sunlight, as expansion and contraction of door components may occur.
6. A substantial overhang and protection from the elements will minimize component movement inherent in exterior wood doors.

High Exposure Finishing

1. Use silicone caulking around the perimeter of each glass pane. This will seal the putty and prevent any moisture from penetrating the door.
2. Use silicone caulking around the perimeter of each panel. This will seal the panel joint and help prevent moisture from penetrating the door.
3. Allow any finish to flow onto the glass area at least 1/16 inch.
4. Storm door may be required to completely eliminate moisture problems. If storm door is used, it must be ventilated to eliminate heat build-up.

Maintenance

Your Rogue Valley Door will need some periodic maintenance to help insure that it has adequate protection against the elements. This regular maintenance is required for the warranty that is provided with every Rogue Valley Door. Some of the following signs are indicators that it is time to re-finish your Rogue Valley Door: chalkiness in finish, flaking of finish, hairline cracks in the finish, and changes in the color of the finish.

Interior Door Finishing Guide

Caution: If during the finish process you are having some issues with your door, stop finishing immediately and contact the company from where you purchased the doors.

Stain & Clear Finish

A solvent-borne system is recommended for interior door applications, and may be that of a lacquer-base.

1. Depending on the type of stain being applied, the door may need to be prepped with a wood conditioner or sanding sealer prior to applying stain. Verify with the stain and top coat manufacturer's instructions.
2. Doors should be sealed with at least two coats of a good quality exterior solvent-borne or water-borne clear finish.
3. Sand lightly between top coats, making sure that all surfaces and edges are covered every time a coat is applied. Clean door of dust before applying the next coat.
4. You can make sure all coatings in the finish system are compatible by using products from the same manufacturer. Finish manufacturers will be able to tell you which of their products may be successfully applied in combination with each other. Finishes should be applied in accordance with the manufacturer's instructions.

Paint Finish

Oil-base or latex resin-base primer and paints may be used on wood doors. Oil-base primer and paints offer more resistance to moisture penetration, and latex resin-base primer and paints will offer better durability and color retention.

1. Doors should be sealed with a good quality primer followed by at least two topcoats of either an oil-base or latex resin-base paint.
2. Sand lightly between coats, making sure that all surfaces and edges are covered every time a coat is applied. Clean door of dust before applying the next coat.
3. You can make sure all coatings in the finish system are compatible by using products from the same manufacturer. Finish manufacturers will be able to tell you which of their products may be successfully applied in combination with each other. Finishes should be applied in accordance with the manufacturer's instructions.

IMPORTANT: *We strongly urge you to read and follow the guidelines detailed above. Failure to follow the guidelines above will invalidate our Limited Warranty. It will be the discretion of Rogue Valley Door or its representative to approve or reject any claim due to poor handling, application, installation or finishing.*

ROGUE VALLEY DOOR LIMITED WARRANTY

All stile and rail door products manufactured by Rogue Valley Door meet or exceed generally accepted industry standards. Rogue Valley Door warrants that at the time of shipment, each door is fabricated with good material and workmanship and is free of defects which would cause the door to be unfit for the ordinary recommended use. Specific warranty periods for doors, door components, and exclusions are as follows:

One Year Exterior Door and Fire Door Limited Warranty
For doors used in an exterior application or interior fire door application will be warranted for one year from the date of shipment from the factory. This warranty applies only to doors that have been properly handled, finished, and for exterior doors installed with a proper overhang in accordance with the Rogue Valley Door Handling, Finishing, and Installation Guidelines.

Ten Year Interior Door Limited Warranty
For doors used in an interior application will be warranted for ten years from the date of shipment from the factory. Interior application is defined as having a controlled interior climatic conditions on both sides of the door. The ten year warranty does not apply to fire rated doors, doors with High Definition Glass (HDG) panels, or doors used in commercial, hospitality, or multi-family applications, in which case the one year warranty will apply. The ten year warranty only applies to the original purchaser, and is non-transferable.

Five Year Rogue Premium Limited Warranty
For doors manufactured using the Rogue Premium construction methods using either 1/4" veneer or solid face laminated stiles and rails. This warranty applies only to doors that have been properly handled, finished, and for exterior doors installed with a proper overhang in accordance with the Rogue Valley Door Handling, Finishing, and Installation Guidelines. The five year warranty only applies to the original purchaser, and is non-transferable.

Five Year Insulated Glass Limited Warranty
Rogue Valley Door warrants that any of our Insulated glass units will not develop a visual obstruction between the two panes of glass caused by the failure of the seal. Rogue Valley Door liability to a seal failure will be to send out a replacement glass unit.

Warranty Exclusions
The following are not considered a defect in your Rogue Valley Door, and are not covered by this written warranty:

1. Failure to properly seal all six edges of the door. The door must be properly finished immediately after fitting and hanging.
2. Natural color or texture variations in the wood.
3. Expansion of bottom rail due to climate conditions is not considered a defect.
4. Damage caused from extreme heat buildup where a storm door, dark paint, or dark stain is being used.
5. Failure to perform routine homeowner's maintenance.
6. Damage from improper storage or handling of the doors. Storage damage includes moisture in doors due to humidity.
7. Panel shrinkage is not considered a defect.
8. Failure to have adequate overhang, see page 155 for details.
9. For doors 3/0 x 7/0 or smaller, warp not exceeding 1/4" in the plane of the door. Warranty will apply for doors up to 3/6 x 8/0, warp not exceeding 3/8" in the plane of the door. Action on any claim or warp may be deferred for a period of up to 1 year, in order to permit conditioning and equalizing to humidity and temperature conditions.
10. Doors larger than 3/6 x 8/0 x 2-1/4 are not covered under this warranty.
11. Plank doors are not warrantied against warp in any size.
12. The performance or appearance of finishes applied is not covered.
13. Surface checking of hardwoods is considered a natural characteristic and is not covered by this warranty.
14. Glazing compound squeeze-out is to be expected and is not a defect.
15. Damage or defects caused by house settling or acts of God.

OUR MANUFACTURING PLANT & FACILITIES

Rogue Valley Door's two plant locations feature 450,000 square feet of manufacturing on 56 acres in Grants Pass, Oregon, where we do everything from slicing raw lumber to shipping out finished doors.

The entire process of creating our beautiful, hand-crafted doors happens here. We design and build doors here. We pre-hang and pre-finish doors here. We slice, dry and splice veneer for our panels, stiles and rails here. Virtually every part of every door we make is constructed right here.

Our plant is home to a tradition of craftsmanship, providing us with the capabilities to be America's largest builder of wood doors.

Door 412 with Side Lites 4705 and Custom Transom all shown in Knotty Alder
