HARVEST+ COLLECTION™

Understated Cathedral Grain

Bring the character of gently worn hardwoods to any outdoor space. Harvest+ features blended colors with subtle highlights, lowlights, and tonal variations — plus artfully layered open and cathedral grain patterns with a low-gloss finish. This collection has the look of a beautifully aged patina for a natural, lived-in feel.

PROFILES

TERRAIN+ COLLECTION®

Subtle Wood Grain

For clients who want maximum style for their dollar, we offer the new Terrain+ Collection. It features the same lightweight, scalloped profile, but with an updated color palette. Thanks to new and improved color blending technology, these boards deliver sophisticated colors with a subtle grain pattern like sanded white oak and walnut for a versatile, natural wood look. Protected by a 30-Year Product, Fade, and Stain Limited Warranty. Features a four-sided, proprietary polymer cap (even in the grooves) made with zero wood fibers for superior moisture resistance.

*Although TimberTech Advanced PVC decking is cooler to the touch than many other composite deck board products, all decking products will get hot in the sun. Additionally, the darker the decking color, the hotter it will feel. For hotter climates, consider choosing a lighter color.

All printed samples are carefully reproduced to be as close to the actual sample as possible. Actual colors may vary due to printing limitations.

DECKING COMPARISON CHART

TimberTech FRAMING

Aluminum Framing: The foundation that stands the test of time

ALUMINUM FRAMING

OUTPERFORMS WOOD AND STEEL

A TimberTech Aluminum Frame means a beautiful, incredibly flat deck with superior performance for years to come — with long-lasting benefits that outperform other framing materials. Made from non-combustible aluminum, it has a Class A Flame Spread Rating and is generally impervious to decay from rust, rot, insects, moisture, and mold.

COMPOSITE

ADVANTAGE RAIL™ New

Quick, simple installation that stays secure

Designed with no visible routings and fitted plugs to hold balusters in place, Advantage Rail gives you a clean look that minimizes baluster rattling. Plus, with patent-pending SPEEDLoc Technology, assembly is fast and easy.

- Fully kitted rail sections available in various colors & formats
- Simple template and bracket
- Easy, side-load baluster installation and secure plugs that minimize rattling

SPEEDLoc Technology for easy side-load installation

Easy loading can be done standing — plugs hold balusters in place, while spacers maintain correct distance.

MODERN

DRINK RAIL

The Drink Rail system works with all full profile, square-shouldered deck boards, but NOT with scalloped boards (i.e., Terrain, Prime, Prime+, or ReliaBoard). Drink Rail cannot be used with glass infill or open mid-rail. Only use 3" posts with the Drink Rail System, including in over-the-post applications.

Decking with real wood beauty & top-rated fire resistance

TimberTech Advanced PVC Decking is the best choice for fire zones

UNDERSTANDING FIRE RESISTANCE

IGNITION RESISTANT

The state of California, and surrounding states that have adopted their standards, have an ignition resistant designation for building materials that resist catching fire or burning easily, and that may slow the spread of flames. Ignition-Resistant decking is less likely to catch fire compared to traditional and composite decking materials.

FLAME SPREAD INDEX

Flame spread ratings are based on the measure of how quickly and how far flames travel across the surface of a material. This indicates a material's resistance to fire and its potential to contribute to the spread of flames. A Class A Flame Spread Rating indicates superior fire resistance, meaning the material is highly effective at inhibiting flame spread.

FLAME SPREAD RATINGS RANGE FROM AN INDEX OF 0-200		
Class A: 0-25 (the "best" score)	Class B: 26-75	Class C: 76-200

The Flame Spread test measures the distance flame travels and the time it travels to determine the A, B, or C Flame Spread Index Classification.

WUI COMPLIANCE (WILDLAND URBAN INTERFACE)

Wildland Urban Interface refers to areas where houses and areas prone to wildfires meet. These areas are at high risk of wildfires, so building codes have specific requirements for materials like decking. Here's what makes a deck WUI Compliant in the state of California (and other neighboring areas):

Resists Flame Spread WUI-approved decking has a flame spread rating from an A to a C. An A rating means it has the lowest rate of flame spread and burns more slowly.

Resists Embers Wildfires often shower sparks and embers, which can ignite materials. WUI-Compliant decking resists catching fire due to flying embers.

The total solution for a fire-resistant deck

Pair decking with other fire-resistant options

ALUMINUM FRAMING

Our non-combustible Aluminum Framing has a Class A Flame Spread Rating for unmatched strength and fire resistance.

METAL RAILING

With classic looks and sleek, minimal design, non-combustible Fulton Rail® and Impression Rail Express® offerstand-out, fire-resistant style.

PREMIUM VINYL RAILING

Featuring versatile design options and a Class A Flame Spread Rating, Reliance Rail™ delivers fire-resistant style at an entry-level price point.

Over 25 WUI-Compliant options for fire zones

AZEK® TRIM WITH PROTECTIVE FILM

AZEK Trim is cellular PVC with a crisp white semi-matte finish providing years of low maintenance for homeowners. Classic White AZEK Trim in smooth and woodgrain finish is covered with a protective film, ensuring it looks as beautiful on your home as it does when it leaves our factory.

AZEK Trim with protective film should be kept dry prior to installation. Do not expose film to direct sunlight for extended periods. Protective film can be removed prior to, during, or immediately after installation.

AZEK® TRIM WITH PAINTPRO® TECHNOLOGY

The best substrate for paint, AZEK Trim with PaintPro® Technology has all the benefits of AZEK Classic Trim including being virtually impervious to moisture. The PaintPro surface helps create a superior paint bond that enhances long-term performance. No primer needed. Paint goes on smoother, dries faster, and adheres stronger than with ordinary PVC.

CLASSIC AZEK SHEET

Applications over 16" wide are easy with Classic White AZEK Sheet. Ideal for use in bay windows, dormers & raised panels.

PAINTPRO SHEET

Applications over 16" wide are easy with AZEK PaintPro Sheet. Ideal for use in bay windows, dormers, and raised panels.

AZEK-TO-MILL (ATM)

ATM's thick profile makes it an ideal material for fabrication. Its consistent density offers a superior product for milling operations.

RABBETED TRIM

With rabbeted edges, this one-piece trimboard is designed to ease siding installation and deliver a crisp facade.

FLANGE SLOTTED TRIM

Typical window trims installed over a window nailing fin need to be shimmed or pulled back for the trim to lay flat. Flange Slotted Window Trim does not and is engineered to create consistent long-lasting window surrounds by removing the installation challenges created by windows installed with a nailing fin.

RABBETED CORNERBOARDS

With rabbeted edges, this one-piece cornerboard is designed to make siding installations a breeze and help deliver a crisp facade with smooth outside edges and dirt-free seams.

CORNERBOARDS

With dirt-free seams that will not open, AZEK® Cornerboards offer faster and more aesthetically pleasing installations to complement any home exterior. Available in both Classic White and with PaintPro Technology.

QUICK-CORNER®

Even an imperfect corner can look perfect with Quick Corner. Both inside and outside corner versions install with hidden fasteners for more beauty and less touch-up. Works with a variety of siding types.

J-CASING

J-Casing offers the most beautiful and seamless transition between your siding and trim. Engineered to reduce labor and save costs by eliminating paint and extra J-channel installs.

UNIVERSAL SKIRT BOARD

A two-piece skirt board with a two-sided trimboard (one side in smooth, the other in woodgrain) designed to assist with water management. Routed with a universal siding interface. Installation is quick and easy.

ONE-PIECE SKIRT BOARD

One-Piece Skirt Board is designed to eliminate purchasing and installing a separate starter strip, skirt board, and flashing while helping drain water away from the main structure. Save time and cost without compromising aesthetics.

INTEGRATED DRIP EDGE

Designed to assist with water management efforts around doors and windows. Comes in two pieces with a two-sided trimboard; one side in smooth and the other in woodgrain. Easy to install, the drip edge has an integrated nailing flange to reduce installation time and costs.

BEADBOARD

AZEK® Beadboard is reversible with an edge and center bead on one side and a v-groove on the other. AZEK Beadboard (E & CB) is certified UL580 class 90 wind gust uplift-resistant, making it ideal for use in coastal areas.

NICKEL GAP & SHIPLAP

AZEK Wainscoting profiles, available in shiplap and reversible WP4/nickel gap form factors, offer enhanced design and installation flexibility.

COLUMN WRAP

Our Column Wrap is now created from a single piece of PVC. Four attached sides fold around the structural post and lock together with a friction-fit joint. Glue all joints with PVC adhesive, secure in place, and trim out as desired.

SOFFIT SYSTEM

Available in two profiles, solid and vented. Both provide climate-resistant material for smooth, beautiful finishing to match any home exterior. Add the notched fascia and frieze board, and you have an efficient, easy-to-install system.

AZEK® ALPINE COLLECTION

Turn up the beauty and turn off maintenance worries with AZEK Alpine in ceilings, soffits, porches, gazebos, and more. New for 2026 is crown moulding and bed moulding, in all six Alpine colors. Building on AZEK Exteriors' experience with long-lasting, low-maintenance polymer materials, AZEK Alpine adds a final layer of realistic, warm woodgrain finishes. It's ready to install with no costly and time-consuming finishing (and refinishing) like wood. Consistent sizing and no wood imperfections helps ensure a high-quality job every time.

Color specific daubers for cut ends also available.

EXPLORE ALL OF OUR MOULDING OPTIONS

Industry-Leading Warranties

With decades in the business and dedicated research and development investments, AZEK provides the best materials on the market. We guarantee the integrity of our siding, cladding, trim, and moulding with a Lifetime Limited Warranty that covers rotting, splintering, and more. AZEK and TimberTech products are easy to maintain and resistant to mold, mildew, and moisture damage. For more information, visit **AZEKexteriors.com/warranty.**

Contractor and Builder Information

AZEK® Siding, Trim, and Moulding and TimberTech Cladding should be installed using good building principles and in accordance with the local building codes. There are important differences in fastening, painting, and gluing PVC that are not the same as wood. Learn and follow these recommendations from published AZEK installation guidelines. AZEK accepts no liability or responsibility for the improper installation of this product.

AZEK Siding, Trim, and Moulding and TimberTech Cladding may not be suitable for every application, and it is the sole responsibility of the installer to be sure that all products are fit for the intended use. As all installations are unique, it is also the installer's responsibility to determine specific requirements in regard to each application. AZEK recommends that all applications be reviewed by a licensed architect, engineer, or local building official before installation.

TimberTech® PVC CLADDING

Superior material for premium performance

AZEK® has unmatched technology to create the most realistic, authentic hardwood look. TimberTech Cladding delivers the beauty, textures, and colors of real wood within an Advanced PVC material. Unlike wood, however, our proprietary materials are essentially maintenance-free, incredibly durable, and are backed by industry-leading warranties for decades. Color, board width, and open- and closed-joint profile options create unlimited design possibilities for both residential and commercial applications. Find details on the Vintage Collection® and Landmark Collection® on pages 4 and 5.

AZEK® PREMIUM SIDING

THREE DISTINCTIVE LOOKS, ONE SUPERIOR MATERIAL

AZEK® Siding choices offer style, durability, and low maintenance. The familiar looks of traditional wood exteriors meet the advanced engineering of ready-for-paint AZEK PVC. Water and moisture, wood's worst enemy, is no match for AZEK. Contemporary to farmhouse, colonial to coastal, AZEK Siding is the best choice for both new construction and R&R.

FAST CURE ADHESIVE

White, two-part, acrylic-based adhesive ideal for bonding AZEK to AZEK products. Also bonds PVC to wood, metal, brick, vinyl, glass, and other PVC. Work time 4-7 minutes at 70°F. Fully cures in 24 hours. Fills nail holes and gaps up to 1/8". Requires Qwik-Mixer for easy mixing and dispensing.

SLOW CURE ADHESIVE

White, two-part, acrylic-based adhesive ideal for bonding AZEK to AZEK products. Also bonds PVC to wood, metal, brick, vinyl, glass and other PVC. Work time 15-25 minutes at 70°F. Fully cures in 24 hours. Fills nail holes and gaps up to 1/2". Requires Qwik-Mixer for easy mixing and dispensing.

CORTEX®

Save time, money, and labor costs with Cortex for AZEK® Trim. The only concealed fastening system that quickly and easily fastens AZEK Trim to your building project comes with collated strips of matching AZEK plugs to make fastening up to 50% faster. The felt tip on the unique bit prevents surface marring while driving fasteners securely below the trim surface. Plugs made of AZEK Trim tap in for a clean, flush finish. No mess or shrinkage like caulk. Plus, Cortex fasteners offer a stronger connection than nails.

CELLULAR PVC CEMENT

Clear, contact-style adhesive bonds with PVC in a fast working time. Ideal for securing joints. Creates a powerful and reliable material bond with no sanding or scraping required. Use AZEK Cellular PVC Cement to connect trim when a tight compression is required, such as connecting trim end-to-end (scarf joints) and at corners (miter joints).

MANUAL 220 ML DISPENSING GUN

Its 26:1 mechanical advantage dispenses high and low viscosity adhesives with less user fatigue. Designed to maximize durability.

MANUAL 50 ML DISPENSING GUN

Made of highly engineered plastic to be lightweight and powerful. Easy loading breech provides secure cartridge fit.
