# Why Coextruded Vinyl Windows and Patio Doors?

## SIMPLY PUT, COEXTRUSION PRODUCES AN ULTRA-HIGH-QUALITY PRODUCT.

Coextrusion enables profiles with black interior and exterior to be produced in one step. Instead of making a frame and adding color later, a UV-resistant black polymer is bonded with durable vinyl from the start.

### BENEFITS:

- Enhanced appearance
- Resilient finish resists weathering and scratches
- UV stabilizers prevent fading
- Faster lead times than painted windows and patio doors
- Low maintenance for homeowners
- 10-year Limited Warranty

# A Bold Impact

Black windows and patio doors can elevate any architectural style. It's a bold yet neutral color that complements a range of materials and finishes in both modern and traditional homes.

All black windows are available with coordinating hardware, SDL bars, grilles and accessories.
