Saberis/Design Portal Integration

Tucker Door has partnered with Saberis to help integrate our quoting/ordering tool into our customer's POS and ERP systems to make it even easier to sync orders from Design Portal into various platforms.

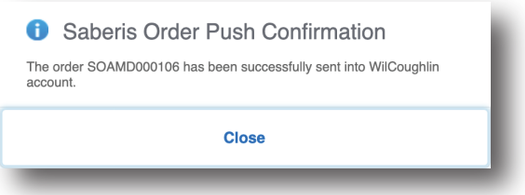

1 Navigate to a QUOTE in Design Portal. Saberis is only available from the QUOTES page. ORDERS will not have Saberis functionality. Once on the Quote Details page, you will now see a 'Send to Saberis' button below the 'Convert to Order' button.

2 The first time you use this feature, it will display a login box. Enter your Saberis provided credentials and hit 'Submit'.

3 Your credentials are now saved in the Tucker Design Portal. In the future, when you open a quote and select 'Send to Saberis' it will automatically send the quote details to Saberis and confirm with an approval prompt without requiring a login.

'Send to Saberis' option does not place an order in Design Portal. Users still need to complete the 'Convert to Order' action.
